SECTION 1: INTERVIEW PROCESS OVERVIEW

1.1 Round Structure by Role Level

Level	Roles	Round 1	Round 2	Round 3	Total Timeline
C-Level	CTO	Culture + Vision (CEO)	Technical Deep-Dive (External Advisor)	Board/Investor Interview	~3 weeks
Senior	Payments PM, Senior Data Eng, BD Lead, PSSP Compliance	HR Screen + Culture (30 min)	Technical/Domain Assessment (2h take-home + 45min review)	Founder Interview + Offer Discussion (45 min)	~2–3 weeks
Mid-Level	Full-Stack, Frontend, Backend, IoT, DevOps, UI/UX, Data Analyst, QA, Market Ops, Logistics	HR Screen + CV Review (20 min)	Technical Assessment (2h take-home + 45min review)	Team Fit + Founder (30 min)	~2 weeks
Junior	Junior Engineers, Support Reps	HR Screen + Basic Quiz (15 min)	Practical Task + Team Interview (1h)	—	~1.5 weeks
Intern	All intern tracks	Application Review (no	Brief Interview + Mini-Task (45 min)	—	~1 week

		call)			
Field Agent	Contract field agents	Application + ID Verification	Group Assessment Day (2h)	—	~3–5 days

1.2 Interviewer Assignment Guide

Role Level	Round 1 Interviewer	Round 2 Interviewer	Round 3 Interviewer
C-Level (CTO)	CEO	External Technical Advisor	CEO + Board Member
Senior	HR + Hiring Manager	Domain Expert / CTO	CEO
Mid-Level (Engineering)	HR	CTO + Senior Engineer	Team Member + CEO
Mid-Level (Non-Engineering)	HR	Hiring Manager + Domain Expert	CEO
Junior	HR	CTO / Senior Engineer	—
Intern	HR	Department Supervisor	—
Field Agent	HR + Operations	Market Ops Manager	—

1.3 Timeline & Communication Standards

- **Acknowledge applications** within 3 business days
- **Complete screening** (Round 1) within 5 business days of shortlisting
- **Schedule Round 2** within 3 business days of passing Round 1
- **Communicate decisions** within 5 business days of final round
- **All rejections** receive a professional notification (see Section 10)

INTERVIEWER SUMMARY NOTES — Process Overview

(HR Lead — use this space to document any process-level notes for this hiring cycle)

Field	Notes
Hiring Cycle / Batch:	_____
Roles Being Filled This Cycle:	_____
Total Applications Received:	_____
Shortlisted for Interview:	_____
Interview Panel Members:	_____
Process Notes / Special Instructions:	_____
	_____
	_____

SECTION 2: PRE-INTERVIEW CHECKLIST

(Complete this checklist BEFORE scheduling any interview. One checklist per candidate.)

Candidate Information

Field	Details
Candidate Name:	_____
Position Applied For:	_____
Role ID:	_____
Application Reference:	CAF-_-_

Document Receipt Checklist

#	Item	Received?	Verified?	Notes
1	Completed Application Form (PECH-HR-CAF)	[ ] Yes [ ] No	[ ] Yes [ ] No	
2	CV / Resume (PDF)	[ ] Yes [ ] No	[ ] Yes [ ] No	
3	Cover Letter	[ ] Yes [ ] No	[ ] N/A	
4	Passport Photograph	[ ] Yes [ ] No	[ ] Yes [ ] No	
5	Educational Certificates (copies)	[ ] Yes [ ] No	[ ] Yes [ ] No	
6	Professional Certifications (if claimed)	[ ] Yes [ ] No	[ ] Yes [ ] No	
7	NIN Verified	[ ] Yes [ ] No	[ ] Yes [ ] No	
8	Portfolio / GitHub / LinkedIn Reviewed	[ ] Yes [ ] No	[ ] N/A (non-tech)	

CV vs Application Form Cross-Check

Item	CV Says	Application Form Says	Match?
Most Recent Employer			[ ] Yes [ ] No
Job Title			[ ] Yes [ ] No
Employment Dates			[ ] Yes [ ] No
Education (Highest)			[ ] Yes [ ] No
Years of Experience			[ ] Yes [ ] No

> **Red Flag:** If CV and Application Form have significant discrepancies, flag for deeper verification in Round 1.

PRE-SCREENING SUMMARY NOTES

(HR Officer — write your initial assessment after reviewing documents)

Candidate Name: _____

Document Review Summary:

_____

_____

_____

Initial Impressions / Strengths:

_____

Concerns / Items to Probe in Interview:

Pre-Screening Decision:

- [ ] **Proceed to Round 1** — Documents satisfactory
- [ ] **Request Additional Information** — Specify: _____
- [ ] **Reject** — Reason: _____

Screened By: ___ *Date:* _/_/____

Signature: _____

SECTION 3: SCORING METHODOLOGY

3.1 Score Scale Definitions

Score	Label	Definition	Indicator
1	Unacceptable	Does not meet minimum requirements. Fundamental gaps in knowledge or skills.	Cannot perform basic role functions
2	Below Expectations	Meets some requirements but has significant gaps. Would need extensive training.	Struggles with standard tasks
3	Meets Expectations	Competent. Can perform the role with normal onboarding and support.	Handles standard tasks independently
4	Exceeds Expectations	Strong candidate. Would add value quickly with minimal ramp-up.	Handles complex tasks, shows initiative
5	Exceptional	Outstanding. Top-tier talent who would elevate the entire team.	Demonstrates mastery, leadership, innovation

3.2 Scoring Dimensions & Weights

Dimension	Weight	What It Measures
Technical Competence	40%	Role-specific skills, knowledge depth, problem-solving ability
Behavioral & Soft Skills	25%	Communication, teamwork, adaptability, work ethic
Cultural Alignment	20%	Values fit (Reliability, Quality, Africa-first, Ownership)
Communication	15%	Clarity of expression, listening, ability to explain complex topics

3.3 Minimum Passing Thresholds

Role Level	Minimum Weighted Average	Meaning
C-Level / Senior	3.5	Must exceed expectations in most dimensions
Mid-Level	3.0	Must meet expectations across the board
Junior	2.5	Must show competence and strong learning potential
Intern	2.0	Potential-weighted — attitude and learning speed matter most
Field Agent	2.5	Must demonstrate reliability, communication, and local knowledge

3.4 Weighted Score Calculation

Formula: Weighted Score = (Technical × 0.40) + (Behavioral × 0.25) + (Cultural × 0.20) + (Communication × 0.15)

Example: A mid-level candidate scores: Technical=4, Behavioral=3, Cultural=4, Communication=3
Weighted Score = (4×0.40) + (3×0.25) + (4×0.20) + (3×0.15) = 1.60 + 0.75 + 0.80 + 0.45 = **3.60** (PASS — above 3.0 threshold)

SCORING CALIBRATION NOTES

(Interview Panel — use this space to align on scoring standards before interviews begin)

Field	Notes
Panel Members Present:	_____
Calibration Date:	_//_
What does a "3" look like for this role?	_____
	_____
What does a "5" look like for this role?	_____
	_____
Any role-specific scoring adjustments?	_____
	_____
Agreed scoring approach notes:	_____
	_____

SECTION 4: ROUND 1 — INITIAL SCREENING

4.1 Phone/Video Screen Template

Duration: 15–30 minutes (varies by level) **Mode:** Phone call or Google Meet/Zoom video call **Interviewer:** HR Officer

Standard Screening Questions

#	Question	What to Listen For	Notes
1	Tell me about yourself and your current situation.	Clarity, relevance, communication style	
2	Why are you interested in PECH Group Holdings?	Research on PECH, genuine motivation, not just "I need a job"	
3	What do you know about what we're building?	Awareness of IoT, marketplace, African tech	
4	Walk me through your most relevant experience for this role.	Specificity, depth, relevance to our needs	

5	What is your current/expected salary?	Alignment with our range, flexibility	
6	What is your notice period / availability?	Can they start when we need them?	
7	Are you interviewing elsewhere? What stage?	Urgency indicator, competitive offers	
8	Do you have any questions about the role or PECH?	Quality of questions shows genuine interest	

Additional Questions for Senior Roles

#	Question	What to Listen For
9	Describe a time you built or scaled a team.	Leadership experience, hiring philosophy
10	How do you approach making technical/strategic trade-offs?	Decision-making framework, pragmatism
11	What excites you about the African tech market?	Market awareness, passion for the mission

4.2 Round 1 Red Flag Checklist

(Check any that apply — 2+ red flags = proceed with caution or reject)

- [ ] Cannot clearly explain their current/previous role
- [ ] CV dates don't match verbal account
- [ ] Overly rehearsed/scripted responses (sounds like ChatGPT)
- [ ] Evasive when asked about specific responsibilities
- [ ] Salary expectations wildly outside our range (>30% above)
- [ ] Negative/unprofessional comments about previous employers
- [ ] Cannot articulate why they want to join PECH specifically
- [ ] Poor communication quality (unrelated to language/accent)
- [ ] Significant unexplained employment gaps without clarification
- [ ] Claims experience with technologies but can't discuss basics
- [ ] Seems disinterested or unprepared for the call

4.3 Round 1 Scorecard

Candidate Name: _____

Position: _____

Interviewer: _____

Date: _//_

#	Criterion	Weight	Score (1-5)	Weighted Score
1	Relevant Experience & Background	30%		
2	Communication & Professionalism	25%		
3	Motivation & Interest in PECH	20%		
4	Salary & Availability Alignment	15%		
5	Cultural Fit Indicators	10%		
	TOTAL WEIGHTED SCORE	**100%**		_____

Minimum to Advance: 2.5 (Junior/Intern), 3.0 (Mid), 3.5 (Senior)

ROUND 1 INTERVIEWER SUMMARY

(Complete this section immediately after the screening call)

Candidate Name: _____

Interviewer Name: _____

Date: _//_ Duration: _____ minutes

Key Strengths Observed:

Key Concerns:

Notable Quotes or Observations:

Salary Expectation vs. Budget:

Candidate Expects (₦/month)	Our Budget (₦/month)	Gap

Recommendation:

- [ ] **ADVANCE to Round 2** — Strong candidate, proceed to technical assessment
- [ ] **HOLD** — Borderline, compare with other candidates first
- [ ] **REJECT** — Does not meet minimum requirements

Reason for Recommendation:

Interviewer Signature: ___ *Date:* _/_/_____

SECTION 5: ROUND 2 — TECHNICAL/DOMAIN ASSESSMENT

5.1 Assessment Overview by Role

Role	Assessment Type	Duration	Delivery
Frontend Developer	Build React component from Figma mockup	2h take-home + 45min live review	GitHub repo
Backend Developer	Build REST API with PostgreSQL integration	2h take-home + 45min live review	GitHub repo
Full-Stack Engineer	End-to-end feature (API + UI)	3h take-home + 1h live review	GitHub repo
Mobile Developer	Build React Native screen with API integration	2h take-home + 45min live review	GitHub repo
IoT/Embedded Engineer	Firmware simulation + MQTT messaging	2h take-home + 45min live review	GitHub repo + video

DevOps Engineer	Configure CI/CD + Docker deployment	2h take-home + 45min live review	GitHub repo
QA/Test Engineer	Write test suite for provided codebase	2h take-home + 30min review	GitHub repo
UI/UX Designer	Redesign a PECH mobile screen	3h take-home + 30min presentation	Figma file
Data Analyst	SQL queries + data insight memo	1.5h take-home + 30min review	SQL file + doc
Payments Product Manager	Payment flow case study	2h take-home + 45min presentation	Slides + doc
PSSP Compliance Officer	Regulatory compliance case study	2h take-home + 30min discussion	Document
Business Development Lead	Market entry strategy case study	2h take-home + 30min presentation	Slides
Market Ops / Logistics	Operations scenario analysis	1h take-home + 30min discussion	Document
Support Representative	Live customer scenario roleplay	30min live (no take-home)	Live session
Junior Engineer	Supervised coding challenge	1h supervised (on-site/video)	Live coding
Intern	Simplified mini-task	1h supervised	Live task
Field Agent	Group aptitude + market roleplay	2h group session	Group activity

5.2 Take-Home Assignment Guidelines

> **Instructions to share with candidates:**
>
> 1. You have **48 hours** from receipt to submit your solution
> 2. Submit via a **private GitHub repository** (add our reviewer as collaborator) or email
> 3. Include a **README** explaining your approach, trade-offs, and what you'd improve with more time
> 4. Use **any resources** you want (Google, docs, StackOverflow) — but the code must be YOUR work
> 5. We value **clean, readable code** over cleverness. Show us how you'd write production code.
> 6. A **live review session** will follow where you walk us through your solution and make modifications
>
> **Anti-Plagiarism Notice:** During the live review, you will be asked to explain your code line-by-line and make real-time modifications. If you cannot explain or modify your own submission, this will be flagged as a disqualifying concern.

5.3 Role-Specific Assessment Details

5.3.1 FRONTEND DEVELOPER ASSESSMENT

Task: Build a responsive dashboard widget component that displays IoT sensor data (temperature, voltage, power output) with a line chart, status indicator, and alert threshold configuration.

Provided: Figma mockup of the widget, sample JSON data, API endpoint specification

Evaluation Criteria:

#	Criterion	Weight	Score (1-5)	Notes
1	Code quality & structure (clean, modular, readable)	20%		

2	TypeScript usage (proper types, no `any` overuse)	15%		
3	Responsive design (mobile, tablet, desktop)	15%		
4	State management approach	10%		
5	Component reusability & design system thinking	10%		
6	Data visualization implementation	10%		
7	Error handling & edge cases	5%		
8	Testing (any tests written)	5%		
9	Live review: Code explanation & modification	10%		
	TOTAL	**100%**		

5.3.2 BACKEND DEVELOPER ASSESSMENT

Task: Build a REST API for managing IoT device registrations with CRUD operations, authentication, pagination, and a webhook endpoint for receiving sensor data.

Provided: API specification document, sample sensor payload, PostgreSQL schema starter

Evaluation Criteria:

#	Criterion	Weight	Score (1-5)	Notes
1	API design (RESTful, consistent, well-structured)	20%		
2	Database schema design & query quality	20%		
3	Error handling & input validation	15%		
4	Authentication implementation (JWT)	10%		
5	Code organization & architecture	10%		
6	Testing (unit/integration tests)	10%		
7	Documentation (README, API docs)	5%		
8	Live review: Code explanation & modification	10%		
	TOTAL	**100%**		

5.3.3 FULL-STACK ENGINEER ASSESSMENT

Task: Build a mini feature end-to-end: A "Device Health Monitor" page that displays real-time sensor data from an API, allows setting alert thresholds, and sends notifications when thresholds are crossed.

Provided: Figma mockup, API specification, database schema starter

Evaluation Criteria:

#	Criterion	Weight	Score (1-5)	Notes
1	Full-stack integration (frontend + API + DB)	20%		
2	Frontend quality (React, TypeScript, responsive)	15%		

3	Backend quality (API design, DB queries)	15%		
4	System design thinking (architecture decisions)	15%		
5	Real-time data handling approach	10%		
6	Error handling across the stack	10%		
7	Testing (any layer)	5%		
8	Live review: System walkthrough & modification	10%		
	TOTAL	**100%**		

5.3.4 IoT / EMBEDDED ENGINEER ASSESSMENT

Task: Write firmware for an ESP32 that reads simulated sensor data (temperature, voltage), publishes readings to an MQTT broker every 10 seconds, handles connection failures with retry logic, and supports OTA update triggering via MQTT command.

Provided: MQTT broker credentials, expected message format, sensor data simulation parameters

Evaluation Criteria:

#	Criterion	Weight	Score (1-5)	Notes
1	Firmware architecture & code organization	20%		
2	MQTT implementation (publish/subscribe, QoS)	20%		
3	Error handling & connection recovery	15%		
4	Sensor reading & data formatting	10%		
5	OTA update mechanism	10%		
6	Memory management & power considerations	10%		
7	Code comments & documentation	5%		
8	Live review: Hardware discussion & code walkthrough	10%		
	TOTAL	**100%**		

5.3.5 DEVOPS ENGINEER ASSESSMENT

Task: Create a Docker Compose setup for a multi-service application (Node.js API + PostgreSQL + Redis + Nginx), write a CI/CD pipeline (GitHub Actions) that builds, tests, and deploys, and set up basic monitoring with health checks.

Provided: Sample Node.js application code, requirements specification

Evaluation Criteria:

#	Criterion	Weight	Score (1-5)	Notes
1	Docker/Docker Compose configuration	20%		
2	CI/CD pipeline design (build, test, deploy stages)	20%		
3	Security practices (secrets, network isolation)	15%		
4	Monitoring & health checks	10%		
5	Infrastructure documentation	10%		

6	Nginx configuration (reverse proxy, SSL)	10%		
7	Scalability considerations	5%		
8	Live review: Architecture discussion & modification	10%		
	TOTAL	**100%**		

5.3.6 UI/UX DESIGNER ASSESSMENT

Task: Redesign the PECH IoT Dashboard mobile screen — given a user scenario (a solar installer checking device status on-site), create a high-fidelity Figma prototype with at least 3 screens (device list, device detail, alert settings).

Provided: Current low-fidelity wireframe, PECH brand guidelines (colors, fonts), user persona description

Evaluation Criteria:

#	Criterion	Weight	Score (1–5)	Notes
1	Visual design quality & brand alignment	20%		
2	User experience & interaction design	20%		
3	Mobile-first & responsive thinking	15%		
4	Figma craftsmanship (components, auto-layout)	15%		
5	User scenario understanding & empathy	10%		
6	Accessibility considerations	10%		
7	Presentation: Design rationale & trade-offs	10%		
	TOTAL	**100%**		

5.3.7 DATA ANALYST ASSESSMENT

Task: Given a sample dataset of marketplace transactions (CSV, ~10K rows), write SQL queries to answer 5 business questions, create 2 visualizations, and write a 1-page insight memo with recommendations.

Provided: CSV dataset, database connection, business questions document

Evaluation Criteria:

#	Criterion	Weight	Score (1–5)	Notes
1	SQL query correctness & efficiency	25%		
2	Data interpretation & business insight	25%		
3	Visualization quality & clarity	15%		
4	Written communication (insight memo)	15%		
5	Methodology & analytical approach	10%		
6	Live review: Explain findings & answer questions	10%		
	TOTAL	**100%**		

5.3.8 QA/TEST ENGINEER ASSESSMENT

Task: Given a partially-tested Node.js API codebase, write a comprehensive test suite covering unit tests, integration tests, and at least one E2E test. Identify and document 3 bugs you find.

Provided: API codebase with existing partial tests, API documentation

Evaluation Criteria:

#	Criterion	Weight	Score (1-5)	Notes
1	Test coverage & strategy	25%		
2	Test quality (meaningful assertions, edge cases)	20%		
3	Bug identification & reporting quality	20%		
4	Test architecture & organization	15%		
5	CI integration consideration	10%		
6	Live review: Testing philosophy discussion	10%		
	TOTAL	**100%**		

5.3.9 PAYMENTS PRODUCT MANAGER ASSESSMENT

Task: Design a payment flow for PECH's marketplace that supports: buyer payments (card, bank transfer, USSD), seller payouts (instant settlement), and escrow for disputed orders. Present your solution as a product brief with user flows, technical requirements, and compliance considerations.

Provided: Marketplace overview document, Nigerian payment landscape brief

Evaluation Criteria:

#	Criterion	Weight	Score (1-5)	Notes
1	Product thinking & user-centricity	20%		
2	Nigerian payments ecosystem knowledge	20%		
3	Regulatory compliance awareness (CBN, PSSP)	15%		
4	Technical feasibility of proposed solution	15%		
5	Presentation quality & communication	15%		
6	Strategic thinking & competitive analysis	15%		
	TOTAL	**100%**		

5.3.10 NON-TECHNICAL ROLES (Ops, BD, Compliance, Support)

For Operations / BD / Compliance roles:

Task: Case study analysis — Given a business scenario relevant to the role, prepare a 15-minute

presentation with your analysis, recommended actions, and success metrics.

Evaluation Criteria:

#	Criterion	Weight	Score (1-5)	Notes
1	Domain knowledge & expertise	25%		
2	Analytical thinking & problem-solving	25%		
3	Strategic & practical recommendations	20%		
4	Communication & presentation skills	20%		
5	Questions asked & engagement	10%		
	TOTAL	**100%**		

For Support Representatives (LIVE — no take-home):

Task: Role-play 3 customer scenarios (15 minutes each): (1) Angry customer with failed payment, (2) Confused user setting up IoT device, (3) Vendor dispute about marketplace listing.

Evaluation Criteria:

#	Criterion	Weight	Score (1-5)	Notes
1	Empathy & customer handling	25%		
2	Problem-solving ability	25%		
3	Communication clarity (English + local languages)	20%		
4	De-escalation skills	15%		
5	Product/process knowledge application	15%		
	TOTAL	**100%**		

5.3.11 JUNIOR ENGINEER ASSESSMENT (SUPERVISED)

Task: 1-hour supervised coding challenge — Build a simple TODO list API with 3 endpoints (create, list, delete) using Node.js + Express + in-memory storage. Or: Build a simple React component that fetches and displays data from a provided API.

Evaluation Criteria:

#	Criterion	Weight	Score (1-5)	Notes
1	Problem-solving approach (how they think)	30%		
2	Code quality for experience level	20%		
3	Learning speed (when given hints/feedback)	20%		
4	Communication while coding	15%		
5	Debugging approach	15%		
	TOTAL	**100%**		

5.3.12 INTERN ASSESSMENT (SUPERVISED)

Task: 30-minute simplified task aligned to department: - **Engineering Interns:** Build a simple function/component with guidance - **Design Interns:** Create a wireframe for a given screen description -

Data Interns: Write basic SQL queries on a provided dataset - **Ops Interns:** Organize and prioritize a list of customer support tickets

Evaluation Criteria:

#	Criterion	Weight	Score (1-5)	Notes
1	Learning speed & coachability	35%		
2	Enthusiasm & attitude	25%		
3	Basic skill demonstration	20%		
4	Communication & questions asked	20%		
	TOTAL	**100%**		

5.3.13 FIELD AGENT ASSESSMENT (GROUP)

Task: Group assessment day (5–10 candidates, 2 hours): 1. Written aptitude test (30 min): Basic math, reading comprehension, map reading 2. Market knowledge quiz (15 min): Local market names, products, pricing awareness 3. Group roleplay (45 min): Simulate vendor verification and data collection 4. Individual presentation (5 min each): "Why I should be a PECH Field Agent"

Evaluation Criteria:

#	Criterion	Weight	Score (1-5)	Notes
1	Communication skills (English + local language)	25%		
2	Local market knowledge	25%		
3	Initiative & problem-solving	20%		
4	Teamwork & collaboration	15%		
5	Aptitude test score	15%		
	TOTAL	**100%**		

5.3.14 AI/ML ENGINEER ASSESSMENT

Task: Build a simple RAG (Retrieval-Augmented Generation) pipeline. Given a set of product documents (solar panel specifications), chunk the documents, generate embeddings, store in a vector database, and build a query endpoint that retrieves relevant chunks and generates an answer using an LLM API.

Provided: 5 sample product PDF documents, a running Ollama instance with Qwen2.5-7B, a Qdrant instance, and a starter Python project

Evaluation Criteria:

#	Criterion	Weight	Score (1-5)	Notes
1	Document chunking approach (size, overlap, quality)	15%		
2	Embedding generation (correct model usage, batching)	15%		
3	Vector database usage (indexing, metadata, filtering)	15%		

4	RAG pipeline correctness (retrieval → context → generation)	20%		
5	Code quality & Python best practices	10%		
6	Error handling & edge cases (empty results, long queries)	5%		
7	Performance awareness (VRAM, latency, batching)	10%		
8	Live review: Explain architecture decisions & trade-offs	10%		
	TOTAL	**100%**		

5.3.15 AI DATA ENGINEER ASSESSMENT

Task: Build an ETL pipeline using Apache Airflow (or equivalent) that: (1) reads product data from a PostgreSQL table, (2) processes and chunks it, (3) generates embeddings, and (4) upserts into Qdrant. The pipeline should handle incremental updates (only new/modified products).

Provided: PostgreSQL database with sample product table, Airflow dev environment, Qdrant instance

Evaluation Criteria:

#	Criterion	Weight	Score (1-5)	Notes
1	Pipeline architecture (DAG design, task dependencies)	20%		
2	Incremental processing (detect new/changed records)	15%		
3	Data quality checks and validation	15%		
4	Error handling and retry logic	15%		
5	SQL proficiency (efficient queries)	10%		
6	Code quality and documentation	10%		
7	Monitoring/alerting considerations	5%		
8	Live review: Explain pipeline design decisions	10%		
	TOTAL	**100%**		

5.3.16 MLOps ENGINEER ASSESSMENT

Task: Given a running Ollama instance with 2 models, containerize a model serving setup with: (1) Docker Compose config, (2) Prometheus monitoring for GPU metrics, (3) a health-check endpoint, and (4) a deployment script with rollback capability.

Provided: Server with GPU access, Ollama installation, Prometheus instance

Evaluation Criteria:

#	Criterion	Weight	Score (1-5)	Notes
1	Docker/containerization best practices	20%		
2	Monitoring setup (GPU metrics, latency, errors)	20%		
3	Health checks and auto-restart logic	15%		
4	Deployment/rollback script quality	15%		
5	Security considerations (secrets, network)	10%		
6	Resource management (GPU allocation, memory)	10%		

7	Live review: Explain infrastructure decisions	10%		
	TOTAL	**100%**		

5.3.17 API / PLATFORM ENGINEER ASSESSMENT

Task: Build a REST API with: (1) an Apache APISIX route configuration for two downstream services, (2) JWT authentication via Keycloak, (3) rate limiting (different tiers), and (4) API versioning (v1/v2 of the same endpoint).

Provided: Running APISIX instance, Keycloak with pre-configured realm, two mock downstream services

Evaluation Criteria:

#	Criterion	Weight	Score (1-5)	Notes
1	APISIX route configuration (correct, clean)	20%		
2	Authentication implementation (JWT, Keycloak)	20%		
3	Rate limiting configuration (multi-tier)	15%		
4	API versioning approach	10%		
5	Error responses and status codes	10%		
6	API documentation (OpenAPI spec)	10%		
7	Code quality and testing	5%		
8	Live review: Explain design trade-offs	10%		
	TOTAL	**100%**		

5.3.18 AI PRODUCT MANAGER ASSESSMENT

Task: (Case Study) PECH is launching an AI-powered solar system design tool for customers. Write a 2-page product brief covering: (1) user journey, (2) AI capabilities needed, (3) subscription tier design, (4) MVP scope vs full scope, and (5) success metrics.

Provided: PECH ecosystem overview document, competitor analysis brief, sample user personas

Evaluation Criteria:

#	Criterion	Weight	Score (1-5)	Notes
1	User journey clarity and completeness	20%		
2	AI feature feasibility (realistic, not sci-fi)	20%		
3	Business model thinking (tiers, pricing, conversion)	20%		
4	MVP scoping (what to cut, what to keep)	15%		
5	Success metrics (measurable, relevant)	15%		
6	Live review: Defend decisions, handle stakeholder pushback	10%		
	TOTAL	**100%**		

5.3.19 AI/ML ENGINEERING INTERN ASSESSMENT (SUPERVISED)

Task: (45-minute supervised) Using a provided Jupyter notebook: (1) load a CSV dataset of customer support tickets, (2) use a pre-trained sentiment analysis model to classify each ticket, (3) visualize the distribution, and (4) explain what you did and why.

Provided: Jupyter notebook with starter code, CSV file, pre-installed libraries

Evaluation Criteria:

#	Criterion	Weight	Score (1–5)	Notes
1	Python proficiency (data loading, pandas)	25%		
2	Model usage (loading, inference, output parsing)	25%		
3	Data visualization (clear, labeled chart)	20%		
4	Communication (explain decisions clearly)	20%		
5	Curiosity & learning attitude	10%		
	TOTAL	**100%**		

ROUND 2 TECHNICAL EVALUATOR SUMMARY

(Complete this section immediately after the technical assessment review)

Candidate Name: _____

Position: _____

Evaluator Name: _____

Date: _//_

Assessment Type: _____ **Duration:** _____

Technical Strengths:

Technical Gaps / Weaknesses:

Code Quality Assessment (for engineering roles):

Aspect	Rating	Notes
Readability	[ ] Poor [ ] Fair [ ] Good [ ] Excellent	
Architecture	[ ] Poor [ ] Fair [ ] Good [ ] Excellent	
Error Handling	[ ] Poor [ ] Fair [ ] Good [ ] Excellent	
Testing	[ ] None [ ] Basic [ ] Good [ ] Comprehensive	

Live Session Observations:

(Did the candidate explain their code convincingly? Could they make modifications? Did they understand trade-offs?)

Anti-Fraud Assessment:

- [ ] Candidate convincingly explained their submission
- [ ] Candidate successfully made live modifications
- [ ] Code style consistent throughout (no copy-paste indicators)
- [ ] **CONCERN:** Candidate struggled to explain parts of their own code

Recommendation:

- [ ] **ADVANCE to Round 3** — Strong technical performance
- [ ] **ADVANCE with Reservations** — Passed but has gaps (specify): _____
- [ ] **HOLD** — Borderline technical, compare with other candidates
- [ ] **REJECT** — Technical skills insufficient for the role

Evaluator Signature: ___ *Date:* _/_/____

SECTION 6: ROUND 3 — CULTURE FIT & LEADERSHIP

6.1 Behavioral Interview Questions

(Select 4–6 questions based on role level. Map to PECH values.)

Reliability & Ownership

#	Question	What to Listen For
1	Tell me about a time you missed a deadline. What happened and what did you learn?	Accountability, no blame-shifting, specific actions taken
2	Describe a project where you had to own the outcome end-to-end.	Independence, initiative, follow-through
3	How do you handle a situation where a teammate isn't pulling their weight?	Conflict resolution, direct communication, professionalism

Quality & Excellence

#	Question	What to Listen For
4	Tell me about a time you shipped something you weren't satisfied with. Why?	Standards, trade-off awareness, desire for quality
5	How do you decide when something is "good enough" to ship?	Pragmatism balanced with quality standards
6	Describe a time you found and fixed a problem nobody else noticed.	Attention to detail, proactivity

Africa-First & Mission Alignment

#	Question	What to Listen For
7	What excites you most about building technology for Africa?	Genuine passion, specific examples, not just

		platitudes
8	What unique challenges do you think tech companies face in Nigeria?	Market awareness, practical understanding
9	How would you design a product for users with limited internet connectivity?	Context awareness, creative problem-solving

Growth Mindset & Adaptability

#	Question	What to Listen For
10	Tell me about the last thing you taught yourself. How did you learn it?	Self-directed learning, curiosity
11	Describe a time you had to work on something completely outside your expertise.	Adaptability, comfort with ambiguity
12	Where do you see yourself in 2–3 years?	Ambition, alignment with PECH growth trajectory

6.2 Scenario-Based Questions

#	Scenario	Role Level	What to Listen For
1	A critical production bug is discovered at 9 PM on a Friday. Walk me through your response.	Engineering	Incident response, ownership, communication
2	A major vendor threatens to leave the marketplace. How would you handle it?	Ops/BD	Negotiation, stakeholder management
3	You disagree with the CTO on a technical approach. What do you do?	All technical	Respectful disagreement, data-driven argument
4	A customer is publicly complaining on social media about your product.	Support/Ops	Crisis communication, empathy

6.3 Round 3 Scorecard

Candidate Name: _____

Position: _____

Interviewer: _____

Date: _//_

#	Criterion	Weight	Score (1-5)	Notes
1	Mission Alignment (Africa-first, PECH vision)	25%		
2	Ownership Mentality (accountability, initiative)	25%		
3	Collaboration & Team Fit	20%		
4	Growth Mindset & Adaptability	15%		
5	Leadership Potential (for senior roles)	15%		
	TOTAL WEIGHTED SCORE	**100%**		_____

ROUND 3 INTERVIEWER SUMMARY

(Complete immediately after the culture fit interview)

Candidate Name: _____

Interviewer Name: _____

Date: _//_ Duration: _____ minutes

Cultural Alignment Assessment:

Leadership Potential (Senior roles):

Team Fit Assessment:

(How would this person work with the existing team? Any personality dynamics to consider?)

Concerns:

Recommendation:

- [ ] **HIRE** — Excellent cultural fit, recommend proceeding to offer
- [ ] **HIRE with Conditions** — Good fit but (specify): _____
- [ ] **HOLD** — Need to compare with other finalists
- [ ] **REJECT** — Cultural misalignment (specify): _____

Interviewer Signature: ___ *Date:* _/_/_____

SECTION 7: FAKE CANDIDATE DETECTION TOOLKIT

7.1 Resume Verification Matrix

(Cross-reference claims against verifiable information)

#	Claim on CV/Application	Verification Method	Verified?	Notes
1	University & Degree	Contact institution / verify online portal	[ ] Yes [ ] No [ ] Pending	
2	Previous Employer 1	Call HR/supervisor (phone from application)	[ ] Yes [ ] No [ ] Pending	
3	Previous Employer 2	Call HR/supervisor	[ ] Yes [ ] No [ ] Pending	
4	Professional Certification	Verify with issuing body	[ ] Yes [ ] No [ ] Pending	
5	LinkedIn Profile	Cross-check dates, titles, companies	[ ] Yes [ ] No [ ] Pending	
6	GitHub/Portfolio	Check activity history, commit patterns	[ ] Yes [ ] No [ ] Pending	

7.2 Technical Fraud Detection Methods

#	Method	When to Use	Red Flag Indicators
1	**Line-by-line code walkthrough**	All technical take-home reviews	Cannot explain own code, long pauses, vague answers
2	**Live modification request**	All technical reviews	Cannot make simple changes to their own code
3	**"Why" chain questioning**	All rounds	Ask "why?" 3 levels deep on any claim — fraudsters collapse at level 2–3
4	**Pair programming**	Senior/Mid engineering	Observe their real-time thinking process
5	**Past project deep-dive**	All technical	Ask about edge cases, bugs encountered, architecture decisions
6	**GitHub activity audit**	Engineering roles	Check: commit frequency, code style consistency, contribution history
7	**Portfolio recreation**	UI/UX designers	Ask to recreate a small element from their portfolio live in Figma
8	**Hardware hands-on**	IoT/Embedded roles	Give them an actual ESP32 board and ask basic operations
9	**Plagiarism check**	Take-home assignments	Run code through plagiarism detectors, check for cookie-cutter patterns
10	**AI-generated content check**	Written assessments	Look for ChatGPT-style phrasing, overly polished but shallow analysis

7.3 Red Flag Severity Matrix

Severity	Indicators	Action
Critical (Immediate Reject)	Cannot explain own code at all; caught with someone else's GitHub; identity mismatch	Terminate interview, document, blacklist
High (Likely Reject)	Significant CV discrepancies confirmed; unable to make basic live modifications; claims skills they demonstrably lack	Complete interview for documentation, likely reject
Medium (Investigate Further)	Minor date inconsistencies; nervous during live coding (could be anxiety); unverifiable employer	Proceed but add extra verification steps
Low (Monitor)	Slightly embellished responsibilities; minor gaps in knowledge; cultural red flags	Note for probation monitoring if hired

---

FRAUD DETECTION NOTES

(Use this space to document any concerns about candidate authenticity)

Candidate Name: _____

Position: _____

Concerns Identified:

#	Concern	Severity (Critical/High/Medium/Low)	Evidence
1			
2			

3			

Verification Actions Taken:

Conclusion:

- [ ] No concerns — candidate appears authentic
- [ ] Minor concerns noted — monitor during probation
- [ ] Significant concerns — recommend rejection
- [ ] Critical fraud detected — blacklist candidate

Documented By: ___ *Date:* _/_/____

SECTION 8: REFERENCE CHECK TEMPLATE

8.1 Reference Check Form

(Complete one form per reference contacted. Minimum 2 references per candidate.)

Candidate Name: _____

Position Applied For: _____

Reference Name: _____

Reference Organization: _____

Reference Relationship to Candidate: _____

Reference Phone / Email: _____

Date of Call: _//_ Call Duration: _____ minutes

Called By: _____

Questions for Previous Employer/Supervisor

#	Question	Response
1	Can you confirm that [Candidate] worked at [Company] as [Title] from [Date] to [Date]?	
2	What were their main responsibilities?	
3	How would you rate their performance on a scale of 1–5?	[ ] 1 [ ] 2 [ ] 3 [ ] 4 [ ] 5
4	What are their key strengths?	
5	What areas could they improve in?	
6	How did they handle pressure and deadlines?	
7	How well did they work with the team?	

8	Why did they leave your organization?	
9	Would you re-hire this person?	[ ] Yes [ ] No [ ] Maybe — Reason:
10	Is there anything else we should know?	

Verification Cross-Check

Item	Candidate Claimed	Reference Confirmed	Match?
Job Title			[ ] Yes [ ] No
Employment Dates			[ ] Yes [ ] No
Responsibilities			[ ] Yes [ ] No
Reason for Leaving			[ ] Yes [ ] No

REFERENCE CHECK SUMMARY

Reference Name: _____

Overall Impression:

Key Positive Points:

Key Concerns Raised:

Reference Reliability:

- [ ] Highly reliable (supervisor/HR, detailed responses)
- [ ] Moderately reliable (colleague, general responses)
- [ ] Low reliability (brief responses, seemed evasive, may be coached)

Reference Checker Signature: ___ *Date:* _/_/_____

SECTION 9: CANDIDATE SCORING CONSOLIDATION

9.1 Master Scorecard

(Combine all round scores into a single consolidated view)

Candidate Name: _____

Position: _____

Date Completed: _//_

Round	Interviewer(s)	Score (1-5)	Weight	Weighted Score	Notes
Round 1: Initial Screening			15%		

Round 2: Technical Assessment			50%		
Round 3: Culture Fit (if applicable)			35%		
TOTAL WEIGHTED SCORE			**100%**	_____	

For 2-Round Processes (Junior, Intern, Field Agent):

Round	Interviewer(s)	Score (1-5)	Weight	Weighted Score	Notes
Round 1: Initial Screening			30%		
Round 2: Technical/Practical			70%		
TOTAL WEIGHTED SCORE			**100%**	_____	

Reference Check Score: _____ / 5

9.2 Candidate Comparison Matrix

(Use when comparing 2–5 finalists for the same position)

Criterion	Candidate 1: __	Candidate 2: __	Candidate 3: __	Candidate 4: __	Candidate 5: __
Round 1 Score					
Round 2 Score					
Round 3 Score					
Total Weighted Score					
Reference Check					
Salary Expectation (₦)					
Availability					
Red Flags?					
Interviewer Preference					
RANKING					

9.3 Decision Categories

Decision	Definition	Next Step
HIRE	Weighted score meets/exceeds threshold, no red flags, references positive	Proceed to offer letter
HOLD	Qualified but not the top candidate; keep in pipeline	Notify candidate of timeline, compare with others
REJECT	Below threshold, significant concerns, or failed verification	Send professional rejection notification

---

OVERALL CANDIDATE SUMMARY

(This is the most important section — the final comprehensive assessment of the candidate)

Candidate Name: _____

Position: _____

Total Weighted Score: _____ / 5.0

Minimum Threshold for Role: _____ / 5.0

Threshold Met: [ ] Yes [ ] No

Key Strengths (top 3):

1.

2.

3.

Key Concerns (if any):

1.

2.

3.

Salary Recommendation:

Field	Details
Candidate's Expectation:	₦_____ /month
Budgeted Range:	₦___ - ₦__ /month
Recommended Offer:	₦_____ /month
Justification:	_____

Start Date Recommendation:

Field	Details
Candidate's Availability:	_____
Our Preferred Start Date:	_//_
Agreed Start Date:	_//_

Special Conditions / Notes:

(e.g., relocation support needed, equipment requirements, probation focus areas, training needs)

Final Decision:

- [ ] **HIRE** — Proceed to offer preparation
- [ ] **HOLD** — Revisit after comparing with remaining candidates
- [ ] **REJECT** — Send professional rejection notification

Decision Rationale (2–3 sentences):

Approval Chain

Level	Name	Signature	Date	Decision
Interviewer(s):	_____	_____	__/__/____	[ ] Hire [ ] Hold [ ] Reject
Hiring Manager:	_____	_____	__/__/____	[ ] Hire [ ] Hold [ ] Reject
HR Department:	_____	_____	__/__/____	[ ] Hire [ ] Hold [ ] Reject
MD/CEO (Senior roles):	_____	_____	__/__/____	[ ] Hire [ ] Hold [ ] Reject

SECTION 10: POST-INTERVIEW ACTIONS

10.1 Offer Letter Preparation Checklist

(For candidates with HIRE decision)

- [ ] Confirm final salary and start date with hiring manager
- [ ] Prepare Employment Contract (use `PECH_FULL_TIME_EMPLOYMENT_CONTRACT.md`)
- [ ] Prepare Schedule B (Job Description & KPIs) from `PECH_SCHEDULE_B_TEMPLATES.md`
- [ ] Prepare NDA (use `PECH_NON_DISCLOSURE_AGREEMENT.md`)
- [ ] Prepare Guarantor Forms (2 copies — use `PECH_GUARANTOR_FORM.md`)
- [ ] Send offer letter with all documents
- [ ] Set acceptance deadline (5 business days recommended)
- [ ] Schedule original certificate sighting
- [ ] Set up new employee onboarding (IT, workspace, accounts)

10.2 Rejection Notification Template

> **Subject:** Your Application to PECH Group Holdings Ltd — [Position Name]
>
> Dear [Candidate Name],
>
> Thank you for taking the time to apply for the [Position Name] role at PECH Group Holdings Ltd and for participating in our interview process.
>
> After careful consideration, we have decided to move forward with another candidate whose experience more closely aligns with our current needs.
>
> This decision does not reflect on your abilities or potential. We were impressed by [mention one genuine positive], and we encourage you to apply for future openings that match your profile.

> We wish you all the best in your career journey.
>
> Warm regards, [HR Officer Name] Human Resources Department PECH Group Holdings Ltd

10.3 Waitlist Notification Template

> **Subject:** Your Application to PECH Group Holdings Ltd — Update
>
> Dear [Candidate Name],
>
> Thank you for your interest in the [Position Name] role at PECH Group Holdings Ltd.
>
> We wanted to update you that while you remain a strong candidate, we are still completing our evaluation process. We expect to make a final decision by [date].
>
> We appreciate your patience and will be in touch soon.
>
> Best regards, [HR Officer Name] Human Resources Department PECH Group Holdings Ltd

10.4 Onboarding Kickoff Checklist

(For the first day/week of a new hire)

- [ ] Employment Contract signed (both parties)
- [ ] Schedule B (Job Description & KPIs) attached and signed
- [ ] NDA signed
- [ ] Guarantor Forms completed and verified (2)
- [ ] Original certificates sighted and copied
- [ ] NIN verified
- [ ] HMO enrollment initiated
- [ ] Pension account details collected / new account opened
- [ ] Bank details collected for salary payment
- [ ] Laptop and work tools issued (log in Asset Register)
- [ ] Company email and Slack/Teams accounts created
- [ ] Access to relevant systems granted (GitHub, Jira, etc.)
- [ ] Staff ID card requested (use `PECH_STAFF_ID_CARD_REQUEST.md`)
- [ ] First-week onboarding schedule shared
- [ ] Assigned onboarding buddy/mentor

POST-INTERVIEW NOTES

(HR — Final notes on the hiring process for this cycle. Capture lessons learned, process improvements, and feedback.)

Hiring Cycle / Batch: _____

Role(s) Filled: _____

Total Candidates Interviewed: _____

Total Offers Made: _____

Total Offers Accepted: _____

Process Feedback:

(What went well? What should we improve for next time?)

Time-to-Hire (from posting to offer acceptance): _____ days

Cost-per-Hire (if tracked): ₦_____

Improvements for Next Cycle:

1.

2.

3.

Completed By: ___ ***Date:*** _/_/____

PECH GROUP HOLDINGS LTD

POLICY NOTES: - All interview records must be retained for a minimum of 12 months, even for rejected candidates. - Candidate personal data must be handled in accordance with the Nigeria Data Protection Act (NDPA) 2023. - Scoring must be documented contemporaneously (at the time of the interview), not retroactively. - At least two interviewers should be present for Round 2 and Round 3 to reduce bias. - Any candidate who raises a complaint about the interview process should be directed to the HR Head.
