PECH GROUP HOLDINGS LTD

Technology & Infrastructure Enablers for Africa

PECH GROUP HOLDINGS

SCHEDULE B: JOB DESCRIPTION & KPIs — TEMPLATES

TABLE OF CONTENTS

Engineering Department

1. CTO / Founding Technical Architect
2. Full-Stack Engineer (ERP + Web)
3. Full-Stack Engineer (Mobile)
4. Frontend Developer
5. Backend Developer
6. IoT / Embedded Systems Engineer
7. DevOps Engineer
8. Junior Software Engineer
9. Senior Data Engineer
10. QA / Test Engineer

Design Department

1. UI/UX Designer

Product & Business

1. Payments Product Manager
2. Data Analyst
3. Business Development Lead
4. PSSP Compliance Officer

Operations

1. Market Operations Manager
2. Logistics Operations Lead
3. Regional Field Coordinator
4. Support Representative
5. Field Agent (Contract)

AI & Platform Roles (New)

1. AI/ML Engineer
2. AI Knowledge / Data Engineer
3. MLOps Engineer

4. API / Platform Engineer
5. AI Product Manager
6. Developer Advocate
7. Technical Writer
8. Installer Training & Network Manager
9. Fintech Operations / Agent Network Manager
10. AI/ML Engineering Intern

---

1. CTO / FOUNDING TECHNICAL ARCHITECT

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	Chief Technology Officer (CTO) / Founding Technical Architect
Department:	Engineering
Reporting To:	Chief Executive Officer (CEO) / Founder
Direct Reports:	All Engineering, Design, and Data staff
Location:	Lagos, Nigeria

Key Responsibilities

1. Define and own the overall technical architecture across all PECH products (ERP, Marketplace, IoT, PSSP)
2. Lead, mentor, and grow the engineering team from founding stage to 15+ engineers
3. Make technology selection and build-vs-buy decisions
4. Establish engineering culture: code reviews, CI/CD, testing standards, sprint methodology
5. Architect scalable, secure systems compliant with NDPA and CBN regulations
6. Manage cloud infrastructure, DevOps pipelines, and system reliability
7. Contribute hands-on code during early phases; transition to architecture and leadership
8. Report technical progress to CEO and investors; participate in fundraising as needed
9. Define and enforce security policies across all systems
10. Manage technical vendor relationships and third-party integrations

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	System uptime	≥99.5%	AWS CloudWatch / monitoring dashboard	Monthly
2	Sprint delivery rate	≥80% story points completed per sprint	Jira/Linear tracking	Bi-weekly
3	Engineering team growth	Hire per plan timeline (±1 month)	Hiring tracker	Quarterly
4	Code review turnaround	<24 hours average	GitHub metrics	Monthly
5	Production incidents (P1/P2)	<2 per quarter	Sentry / incident log	Quarterly

6	Technical debt ratio	<20% of sprint capacity on tech debt	Sprint planning data	Quarterly
7	Security audit compliance	Zero critical vulnerabilities	Security audit reports	Semi-annually
8	Platform scalability	Handle 10x user growth without re-architecture	Load testing results	Semi-annually

Required Tools & Platforms

React/Next.js, React Native, Node.js, Python, PostgreSQL, MongoDB, Redis, MQTT, ESP32, AWS/Azure, Docker, Kubernetes, GitHub, Sentry, Jira/Linear

Growth Path

CTO → CTO + Board Member → CTO + Co-Founder equity vesting

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

2. FULL-STACK ENGINEER (ERP + WEB)

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	Full-Stack Engineer (ERP + Web)
Department:	Engineering
Reporting To:	CTO
Direct Reports:	None (may mentor interns)
Location:	Lagos, Nigeria

Key Responsibilities

1. Develop and maintain the PECH ERP system (inventory, orders, invoicing, reporting)
2. Build responsive web applications using React/Next.js with TypeScript
3. Design and implement RESTful APIs and GraphQL endpoints using Node.js
4. Integrate with payment gateways, SMS providers, and third-party APIs
5. Write database schemas, queries, and migrations (PostgreSQL)
6. Implement authentication, authorization, and role-based access control
7. Write unit and integration tests; participate in code reviews
8. Collaborate with UI/UX designer on user-facing features

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Sprint velocity	≥80% story points delivered	Jira/Linear	Bi-weekly
2	Code review turnaround	<24 hours	GitHub PR metrics	Monthly
3	Production bugs introduced	<3 bugs per quarter attributed to own code	Sentry tracking	Quarterly
4	Test coverage on new code	≥70%	Jest/CI coverage reports	Monthly
5	Feature delivery quality	<10% rework rate on delivered features	Sprint retrospective data	Quarterly
6	Documentation	All new features documented	Confluence/README audit	Quarterly

Growth Path

Full-Stack Engineer → Senior Engineer → Tech Lead → Engineering Manager / Architect

---

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

---

3. FULL-STACK ENGINEER (MOBILE)

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	Full-Stack Engineer (Mobile)
Department:	Engineering
Reporting To:	CTO
Direct Reports:	None (may mentor interns)
Location:	Lagos, Nigeria

Key Responsibilities

1. Develop cross-platform mobile applications using React Native or Flutter
2. Build mobile APIs and backend services
3. Implement offline-first architecture for low-connectivity areas
4. Integrate with IoT devices (Bluetooth, MQTT) for real-time monitoring
5. Optimize for performance on low-end Android devices
6. Publish and maintain apps on Google Play Store and Apple App Store
7. Write tests and participate in code reviews
8. Collaborate with backend team on API contracts

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	App crash rate	<1% across all devices	Firebase Crashlytics	Monthly
2	App store rating	≥4.0 stars	Play Store / App Store	Quarterly
3	Sprint velocity	≥80% story points delivered	Jira/Linear	Bi-weekly
4	App performance (cold start)	<3 seconds on mid-range Android	Performance testing	Monthly
5	Offline sync reliability	≥99% successful syncs	Analytics tracking	Monthly
6	Production bugs	<3 per quarter	Sentry / Crashlytics	Quarterly

Growth Path

Mobile Engineer → Senior Mobile Engineer → Mobile Tech Lead → Engineering Manager

---

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

---

4. FRONTEND DEVELOPER

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

PECH GROUP HOLDINGS LTD

Field	Details
Job Title:	Frontend Developer
Department:	Engineering
Reporting To:	CTO
Direct Reports:	None
Location:	Lagos, Nigeria

Key Responsibilities

1. Build and maintain responsive web interfaces using React/Next.js and TypeScript
2. Translate Figma mockups into pixel-perfect, accessible UI components
3. Implement client-side state management
4. Build reusable component libraries
5. Optimize web performance (Core Web Vitals)
6. Implement data visualization for IoT dashboards
7. Write frontend tests (Jest, Cypress)
8. Collaborate with UI/UX designer and backend engineers

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Core Web Vitals (LCP, FID, CLS)	All green on Google PageSpeed	PageSpeed Insights	Monthly
2	Design-to-code fidelity	≥95% match with Figma specs	Design review sessions	Monthly
3	Sprint velocity	≥80% story points delivered	Jira/Linear	Bi-weekly
4	Frontend test coverage	≥60% on new components	Jest coverage reports	Monthly
5	Accessibility compliance	WCAG 2.1 AA on all new pages	Lighthouse / axe audits	Quarterly
6	Bug introduction rate	<2 UI bugs per sprint	Sentry / QA reports	Bi-weekly

Growth Path

Frontend Developer → Senior Frontend Developer → Frontend Tech Lead → Engineering Manager

---

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

---

5. BACKEND DEVELOPER

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	Backend Developer
Department:	Engineering
Reporting To:	CTO
Direct Reports:	None
Location:	Lagos, Nigeria

Key Responsibilities

1. Design, build, and maintain RESTful and GraphQL APIs using Node.js
2. Design and optimize database schemas (PostgreSQL, MongoDB)
3. Integrate with payment gateways, SMS providers, and third-party APIs
4. Implement authentication and API security (JWT, OAuth2, RBAC)
5. Build data pipelines for IoT sensor data ingestion
6. Write API documentation (OpenAPI/Swagger)
7. Implement logging, monitoring, and alerting
8. Write unit and integration tests

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
	API response time (P95)		APM / CloudWatch	

1		<200ms for standard endpoints		Monthly
2	API error rate	<0.5% of all requests	Sentry / monitoring	Monthly
3	Sprint velocity	≥80% story points delivered	Jira/Linear	Bi-weekly
4	Test coverage	≥75% on new services	Jest coverage reports	Monthly
5	API documentation	All endpoints documented within sprint	Swagger audit	Monthly
6	Database query performance	No queries >500ms in production	Slow query logs	Monthly

Growth Path

Backend Developer → Senior Backend Developer → Backend Tech Lead → Engineering Manager / Architect

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

6. IoT / EMBEDDED SYSTEMS ENGINEER

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	IoT / Embedded Systems Engineer
Department:	Engineering
Reporting To:	CTO
Direct Reports:	IoT Interns
Location:	Lagos, Nigeria (On-site — Lab)

Key Responsibilities

1. Develop firmware for ESP32/STM32 microcontrollers for solar monitoring devices
2. Design sensor data acquisition systems (voltage, current, temperature, irradiance)
3. Implement MQTT-based communication between devices and cloud
4. Build OTA firmware update systems
5. Design PCB schematics and prototype hardware
6. Implement edge computing logic for local alerts
7. Develop device provisioning and management systems
8. Ensure device security (encryption, secure boot)

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Device uptime	≥98% connected devices online	IoT dashboard	Monthly
2	Data transmission reliability	≥99% messages delivered	MQTT broker logs	Monthly
3	OTA update success rate	≥95% first-attempt success	OTA management system	Per release
4	Firmware bug rate	<1 critical bug per release	Bug tracker	Per release
5	Prototype-to-production cycle	<8 weeks per device version	Project timeline	Quarterly
6	Power consumption optimization	Meet battery life targets (spec-dependent)	Lab testing	Per prototype

Growth Path

IoT Engineer → Senior IoT Engineer → IoT/Hardware Lead → VP Engineering (IoT)

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

---

7. DEVOPS ENGINEER

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	DevOps Engineer
Department:	Engineering
Reporting To:	CTO
Direct Reports:	DevOps Interns
Location:	Lagos, Nigeria (Hybrid/Remote)

Key Responsibilities

1. Design and maintain CI/CD pipelines (GitHub Actions)
2. Manage cloud infrastructure on AWS/Azure
3. Implement Infrastructure as Code (Terraform)
4. Set up monitoring, alerting, and logging (Sentry, CloudWatch, Grafana)
5. Manage Docker containers and orchestration
6. Implement security best practices
7. Automate database backups and disaster recovery
8. Manage domains, DNS, CDN, and SSL certificates

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	System uptime (all services)	≥99.5%	CloudWatch / uptime monitor	Monthly
2	Deployment frequency	≥2 production deploys per week	CI/CD pipeline logs	Monthly
3	Mean time to recovery (MTTR)	<1 hour for P1 incidents	Incident log	Quarterly
4	CI/CD pipeline success rate	≥90% builds pass first time	GitHub Actions metrics	Monthly
5	Infrastructure cost optimization	Stay within ±10% of budget	AWS/Azure billing	Monthly
6	Security compliance	Zero unpatched critical CVEs >7 days	Vulnerability scanner	Monthly

Growth Path

DevOps Engineer → Senior DevOps → Platform/Infrastructure Lead → VP Engineering (Infra)

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

---

8. JUNIOR SOFTWARE ENGINEER

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

P E C H G R O U P H O L D I N G S L T D

Field	Details
Job Title:	Junior Software Engineer
Department:	Engineering
Reporting To:	CTO / Senior Engineer
Direct Reports:	None
Location:	Lagos, Nigeria (On-site)

Key Responsibilities

1. Write clean, well-tested code for assigned features and bug fixes
2. Participate in code reviews (reviewing and being reviewed)
3. Write unit and integration tests
4. Fix bugs and respond to production issues under guidance
5. Document code and technical decisions

6. Pair program with senior engineers on complex features
7. Learn and apply PECH coding standards and best practices
8. Participate in sprint ceremonies (planning, standups, retros)

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Task completion rate	≥70% of assigned tasks per sprint	Jira/Linear	Bi-weekly
2	Code review feedback	Decreasing revision requests over time	GitHub PR metrics	Monthly
3	Learning milestones	Complete onboarding curriculum within 3 months	Checklist tracker	Quarterly
4	Bug fix turnaround	<2 business days for minor bugs	Bug tracker	Monthly
5	Test coverage on own code	≥50%	Jest coverage	Monthly
6	Proactive communication	Raises blockers within 2 hours	Team observation	Monthly

Growth Path

Junior Engineer → Mid-Level Engineer (12–18 months) → Senior Engineer → Tech Lead

---

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

---

9. SENIOR DATA ENGINEER

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	Senior Data Engineer
Department:	Engineering
Reporting To:	CTO
Direct Reports:	Data Analyst, Data Interns
Location:	Lagos, Nigeria (Hybrid)

Key Responsibilities

1. Design and build scalable data pipelines (ETL/ELT) for IoT, marketplace, and financial data
2. Build and maintain the data warehouse
3. Implement real-time data streaming for IoT sensor data
4. Create data models and schemas for analytics
5. Build automated reporting dashboards and data APIs
6. Implement data quality monitoring and alerting
7. Ensure data governance and NDPA compliance

8. Mentor Data Analyst and data interns

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Pipeline reliability	≥99% SLA on scheduled pipelines	Airflow / pipeline monitoring	Monthly
2	Data freshness	<15 min lag for real-time data	Pipeline metrics	Monthly
3	Data quality score	≥95% on validation checks	Data quality framework	Monthly
4	Query performance	95th percentile <5 seconds for dashboards	Query performance logs	Monthly
5	Documentation	All pipelines documented	Data catalog audit	Quarterly
6	Cost optimization	Data infrastructure within budget	Cloud billing	Monthly

Growth Path

Senior Data Engineer → Staff Data Engineer → Head of Data → VP Engineering (Data)

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

10. QA / TEST ENGINEER

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	QA / Test Engineer
Department:	Engineering
Reporting To:	CTO
Direct Reports:	None
Location:	Lagos, Nigeria (Hybrid)

Key Responsibilities

1. Design comprehensive test strategies (unit, integration, E2E, performance)
2. Write and maintain automated test suites
3. Perform manual exploratory testing
4. Manage test environments and test data
5. Create and track bug reports
6. Monitor production error rates (Sentry)
7. Collaborate with developers on testable code patterns

8. Report quality metrics to engineering leadership

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Test automation coverage	≥60% of critical paths automated	Test suite metrics	Quarterly
2	Bugs found before release	≥80% of bugs caught pre-production	Bug tracker analysis	Monthly
3	Regression test pass rate	≥95% on each release	CI/CD test reports	Per release
4	Bug report quality	<5% "cannot reproduce" rate	Developer feedback	Monthly
5	Test execution cycle time	<2 hours for full regression suite	CI pipeline timing	Monthly
6	Production escape rate	<5 production bugs per quarter missed by QA	Sentry / production bugs	Quarterly

Growth Path

QA Engineer → Senior QA Engineer → QA Lead → Head of Quality

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

---

11. UI/UX DESIGNER

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	UI/UX Designer
Department:	Design
Reporting To:	CTO (initially), Product Manager (later)
Direct Reports:	Design Interns
Location:	Lagos, Nigeria (Hybrid)

Key Responsibilities

1. Create wireframes, high-fidelity mockups, and interactive prototypes in Figma
2. Design mobile-first interfaces for all PECH products

3. Conduct user research with Nigerian market users
4. Build and maintain the PECH design system
5. Design for accessibility and low-literacy users
6. Create marketing visuals and brand materials
7. Collaborate with frontend developers on implementation fidelity
8. Iterate designs based on user feedback and analytics

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Design delivery speed	Mockups delivered within sprint timeline	Sprint tracking	Bi-weekly
2	Developer handoff quality	<10% design-related questions post-handoff	Developer feedback survey	Monthly
3	User research frequency	≥2 user research sessions per quarter	Research log	Quarterly
4	Design system completeness	All active components in design system	Component audit	Quarterly
5	Usability score	≥70 SUS score on tested screens	Usability testing results	Quarterly
6	Brand consistency	100% adherence to brand guidelines	Design review	Monthly

Growth Path

UI/UX Designer → Senior Designer → Design Lead → Head of Design

---

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

---

12. PAYMENTS PRODUCT MANAGER

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	Payments Product Manager
Department:	Product & Business
Reporting To:	CEO
Direct Reports:	Data Analyst (shared)
Location:	Lagos, Nigeria (On-site)

Key Responsibilities

1. Define product roadmap for PECH payment services
2. Manage PSSP/PSP licensing process with CBN
3. Design compliant payment flows (CBN, NIBSS, NIP)
4. Work with engineering on PCI-DSS compliant payment systems
5. Manage payment partner relationships
6. Define and track payment KPIs
7. Conduct competitive analysis of Nigerian fintech landscape
8. Manage product backlog using agile methodology

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Transaction success rate	≥95%	Payment gateway analytics	Monthly
2	Settlement turnaround	≤T+1 for marketplace sellers	Settlement reports	Monthly
3	Product roadmap delivery	≥80% of quarterly goals achieved	OKR tracking	Quarterly
4	Regulatory compliance	Zero compliance violations	Audit reports	Quarterly
5	Payment fraud rate	<0.1% of transactions	Fraud monitoring system	Monthly
6	Customer payment NPS	≥50	NPS surveys	Quarterly

Growth Path

Payments PM → Senior PM → VP Product → Chief Product Officer

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

---

13. DATA ANALYST

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	Data Analyst
Department:	Product & Business
Reporting To:	Payments Product Manager / CTO
Direct Reports:	Data Interns
Location:	Lagos, Nigeria (Hybrid)

Key Responsibilities

1. Build and maintain business intelligence dashboards
2. Analyze user behavior, conversion funnels, and retention metrics
3. Produce weekly/monthly reports on key business metrics
4. Run ad-hoc analyses for product and business decisions
5. Design and analyze A/B tests

6. Monitor data quality and flag anomalies
7. Collaborate with Data Engineer on pipeline requirements
8. Present insights to leadership with clear recommendations

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Report delivery	All scheduled reports on time	Report calendar	Monthly
2	Dashboard accuracy	Zero data errors in published dashboards	Error tracking	Monthly
3	Ad-hoc analysis turnaround	<3 business days for standard requests	Request tracker	Monthly
4	Insight actionability	≥50% of insights lead to actions	Insight tracking log	Quarterly
5	Data literacy training	≥1 training session for non-data team per quarter	Training log	Quarterly
6	A/B test analysis quality	Results validated with statistical rigor	Peer review	Per experiment

Growth Path

Data Analyst → Senior Data Analyst → Analytics Manager → Head of Analytics

PECH GROUP HOLDINGS LTD

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

14. BUSINESS DEVELOPMENT LEAD

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	Business Development Lead
Department:	Product & Business
Reporting To:	CEO
Direct Reports:	None (initially)
Location:	Lagos, Nigeria (On-site + Field)

Key Responsibilities

1. Identify, pursue, and close enterprise sales opportunities
2. Build partnerships with solar companies, logistics providers, and financial institutions

3. Develop and maintain sales pipeline using CRM
4. Negotiate contracts and commercial terms
5. Represent PECH at industry events and conferences
6. Conduct market research and competitive analysis
7. Collaborate with Product team on customer feedback
8. Achieve quarterly revenue and partnership targets

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Revenue from partnerships	≥₦10M quarterly (scaling by phase)	CRM / finance reports	Quarterly
2	Active pipeline value	≥3x quarterly target	CRM pipeline tracking	Monthly
3	New partnerships signed	≥2 strategic partnerships per quarter	Partnership tracker	Quarterly
4	Sales cycle time	<45 days average for SME clients	CRM deal tracking	Quarterly
5	Client retention rate	≥85% annual retention	Client tracking	Annually
6	Market events attended	≥4 per quarter	Event log	Quarterly

Growth Path

BD Lead → Head of Business Development → VP Sales & Partnerships → Chief Revenue Officer

---

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

---

15. PSSP COMPLIANCE OFFICER

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	PSSP Compliance Officer
Department:	Product & Business
Reporting To:	CEO
Direct Reports:	None
Location:	Lagos, Nigeria (On-site)

Key Responsibilities

1. Manage PSSP/PSP licensing with CBN
2. Implement AML/CFT framework

3. Design and enforce KYC/KYB procedures
4. Conduct regular compliance audits and risk assessments
5. Prepare regulatory reports for CBN, NDIC
6. Train staff on compliance policies
7. Monitor regulatory changes and advise management
8. Manage relationships with regulators

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Regulatory compliance	Zero compliance violations	Audit reports	Quarterly
2	KYC completion rate	100% of customers/vendors KYC verified	KYC system	Monthly
3	Suspicious transaction reports	Filed within 24 hours of detection	STR log	Per incident
4	Staff training completion	100% of relevant staff trained annually	Training records	Annually
5	Audit readiness	Pass all internal/external audits	Audit results	Semi-annually
6	Policy documentation	All policies reviewed and updated annually	Policy register	Annually

Growth Path

Compliance Officer → Head of Compliance → Chief Compliance Officer

---

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

---

16. MARKET OPERATIONS MANAGER

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

P E C H G R O U P H O L D I N G S L T D

Field	Details
Job Title:	Market Operations Manager
Department:	Operations
Reporting To:	CEO
Direct Reports:	Support Reps, Field Agents, Regional Coordinators
Location:	Lagos, Nigeria (On-site + Field)

Key Responsibilities

1. Manage vendor onboarding, verification, and quality control
2. Monitor marketplace KPIs (GMV, fulfillment rate, CSAT)
3. Handle customer disputes, refunds, and escalations
4. Coordinate with logistics team on delivery
5. Train and manage field agents
6. Implement marketplace policies
7. Conduct field visits to vendors and markets
8. Report operational metrics to management

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Vendor onboarding rate	≥20 new vendors per month (scaling)	Vendor management system	Monthly
2	Order fulfillment rate	≥90%	Order tracking system	Monthly
3	Customer satisfaction (CSAT)	≥4.0/5.0	Customer survey	Monthly
4	Dispute resolution time	<48 hours average	Ticket tracking	Monthly
5	Field agent performance	≥80% agents meeting targets	Agent scorecard	Monthly
6	Marketplace GMV growth	≥15% month-over-month (early stages)	Finance reports	Monthly

Growth Path

Market Ops Manager → Head of Operations → VP Operations → COO

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

---

17. LOGISTICS OPERATIONS LEAD

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Field	Details
Job Title:	Logistics Operations Lead
Department:	Operations
Reporting To:	Market Operations Manager / CEO
Direct Reports:	Warehouse staff, dispatch riders
Location:	Lagos, Nigeria (On-site + Field)

Key Responsibilities

1. Design and optimize delivery routes and workflows
2. Manage third-party logistics providers
3. Implement warehouse operations
4. Track delivery KPIs
5. Coordinate equipment installation logistics

6. Implement inventory management systems
7. Handle logistics customer complaints
8. Plan logistics expansion to new regions

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	On-time delivery rate	≥85%	Delivery tracking system	Monthly
2	Cost per delivery	Decreasing trend (benchmark after 3 months)	Finance reports	Monthly
3	Damage/loss rate	<2% of shipments	Claims tracker	Monthly
4	Warehouse accuracy	≥98% inventory accuracy	Stock audit	Monthly
5	Delivery partner SLA compliance	≥90%	Partner scorecard	Monthly
6	Customer delivery NPS	≥40	NPS survey	Quarterly

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

18. REGIONAL FIELD COORDINATOR

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Field	Details
Job Title:	Regional Field Coordinator
Department:	Operations
Reporting To:	Market Operations Manager
Direct Reports:	Field Agents (regional)
Location:	Assigned region, Nigeria

Key Responsibilities

1. Recruit, train, and manage field agents in assigned region
2. Supervise market surveys and vendor verification
3. Coordinate solar/IoT installations in the region
4. Monitor field agent performance and submit weekly reports
5. Handle regional customer escalations
6. Build local partnerships
7. Ensure compliance with PECH operational standards
8. Report market intelligence and growth opportunities

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Field agent productivity	≥80% agents meeting weekly targets	Agent reports	Weekly
2	Survey/data collection accuracy	≥95% data quality score	Quality audits	Monthly
3	Regional vendor growth	≥10 new vendors per month	Vendor tracker	Monthly
4	Installation success rate	≥90% first-visit success	Installation log	Monthly
5	Weekly report submission	100% on-time submission	Report tracker	Weekly
6	Customer escalation resolution	<72 hours average	Ticket system	Monthly

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

19. SUPPORT REPRESENTATIVE

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Field	Details
Job Title:	Support Representative
Department:	Operations
Reporting To:	Market Operations Manager
Direct Reports:	None
Location:	Lagos, Nigeria (On-site)

Key Responsibilities

1. Respond to customer inquiries via phone, email, WhatsApp, and live chat
2. Troubleshoot basic IoT device issues
3. Process order inquiries, refunds, and vendor disputes
4. Escalate technical issues to engineering with documentation
5. Maintain support knowledge base and FAQ
6. Track support metrics
7. Follow up with customers on pending issues
8. Identify complaint patterns and suggest improvements

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	First response time	<30 minutes (business hours)	Support tool metrics	Monthly
2	Resolution time	<4 hours for standard issues	Support tool metrics	Monthly
3	Customer satisfaction (CSAT)	≥4.0/5.0	Post-interaction survey	Monthly
4	Ticket volume handled	≥15 tickets per day	Support tool reports	Monthly

5	First contact resolution rate	≥60%	Support tool metrics	Monthly
6	Escalation quality	<5% returned escalations	Engineering feedback	Monthly

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

20. FIELD AGENT (CONTRACT)

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

(For use with PECH Contract Worker Agreement)

Field	Details
Job Title:	Field Agent
Department:	Operations
Reporting To:	Regional Field Coordinator / Market Operations Manager
Direct Reports:	None
Location:	Assigned operational area, Nigeria

Key Responsibilities

1. Conduct market surveys and data collection using mobile apps
2. Verify vendor identities, locations, and business credentials
3. Assist with solar panel and IoT device installations
4. Collect customer feedback and market intelligence
5. Distribute marketing materials and represent PECH locally
6. Submit daily activity reports and field data
7. Maintain PECH equipment and branded materials
8. Follow safety protocols during field operations

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Daily activity reports	100% daily submission	Mobile app tracking	Daily/Weekly
2	Survey accuracy	≥90% data quality score	Quality audits	Monthly
3	Vendor verifications per week	≥10 (area-dependent)	Verification tracker	Weekly
4	Customer feedback collected	≥5 per day in active areas	App tracking	Weekly
5	Equipment condition	Zero preventable damage	Equipment audit	Monthly
6	Attendance & reliability	≥90% scheduled days active	Attendance tracker	Monthly

21. AI/ML ENGINEER

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	AI/ML Engineer
Department:	Engineering
Reporting To:	CTO
Direct Reports:	AI/ML Interns
Location:	Lagos, Nigeria

Key Responsibilities

1. Deploy and manage self-hosted LLMs (Qwen2.5, Mistral, Phi) using Ollama and vLLM
2. Build and maintain RAG pipelines using LangChain, Qdrant, and embedding models
3. Fine-tune models on PECH business data using LoRA/QLoRA
4. Integrate AI capabilities into microservices (chatbot, OCR, speech, recommendations)
5. Optimize model inference (quantization, batching, GPU memory management)
6. Build AI agents using LangGraph for multi-step tasks
7. Implement fraud detection, dynamic pricing, and predictive maintenance ML models
8. Monitor model performance, A/B test model versions, and track AI metrics

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Model deployment success rate	≥95%	Deployment logs	Monthly
2	AI response latency (P95)	<3 seconds	Prometheus metrics	Weekly
3	RAG answer accuracy	≥85% user satisfaction	User feedback ratings	Monthly
4	Model uptime	≥99% availability	Monitoring dashboard	Monthly
5	Fine-tuning cycles completed	≥1 per quarter	Training logs	Quarterly
6	GPU utilization efficiency	≥60% average	nvidia-smi metrics	Monthly
7	AI features shipped	≥2 per quarter	Sprint tracking	Quarterly

Required Tools & Platforms

Qwen2.5, Phi-4, Mistral, vLLM, Ollama, LangChain, LangGraph, Qdrant, PyTorch, Transformers, PEFT, XGBoost, Docker, NVIDIA CUDA

Growth Path

AI/ML Engineer → Senior AI/ML Engineer → AI Lead → Head of AI

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

22. AI KNOWLEDGE / DATA ENGINEER

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	AI Knowledge / Data Engineer
Department:	Engineering
Reporting To:	CTO / AI/ML Engineer
Direct Reports:	None
Location:	Lagos, Nigeria

Key Responsibilities

1. Build ETL pipelines using Apache Airflow to ingest data from all PECH platforms
2. Design and maintain the RAG knowledge base (chunking, embedding, indexing)
3. Manage Qdrant vector database (indexing, filtering, performance)
4. Create data quality checks and monitoring for AI training data
5. Build data connectors for ERPNext, Medusa, Chatwoot, ThingsBoard, Fineract
6. Implement data anonymization and NDPA compliance for AI training data
7. Support model fine-tuning with curated training datasets

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Data pipeline uptime	≥99%	Airflow monitoring	Monthly
2	RAG knowledge freshness	Data indexed within 24h of change	Pipeline logs	Weekly
3	Data quality score	≥95% completeness, ≥90% accuracy	Quality audits	Monthly
4	Embedding index size growth	Aligned with data growth plan	Qdrant metrics	Monthly
5	Pipeline failure recovery	<2 hour MTTR	Incident logs	Monthly
6	NDPA compliance	Zero data protection violations	Compliance audits	Quarterly

Required Tools & Platforms

Python, PostgreSQL, Apache Airflow, Qdrant, DuckDB, Redis, LangChain, Docker, Sentence Transformers, Pandas, Apache Superset

Growth Path

Data Engineer → Senior Data Engineer → Data Engineering Lead → Head of Data

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

PECH GROUP HOLDINGS LTD

23. MLOps ENGINEER

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	MLOps Engineer
Department:	Engineering
Reporting To:	CTO
Direct Reports:	None
Location:	Lagos, Nigeria

Key Responsibilities

1. Manage vLLM production cluster (multi-model serving, load balancing)
2. Build CI/CD pipelines for model deployment
3. Monitor model performance (latency, throughput, accuracy drift)
4. Implement auto-scaling for AI services
5. Manage GPU resource allocation across models
6. Set up model versioning, A/B testing, and rollback procedures
7. Optimize infrastructure costs (cloud GPU vs local)
8. Maintain K3s deployment for AI workloads

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	AI service uptime	≥99.5%	Prometheus/Grafana	Monthly
2	Model deployment time	<30 minutes (staging to prod)	CI/CD pipeline logs	Monthly
3	Infrastructure cost efficiency	Within budget ±10%	Cost tracking	Monthly
4	GPU utilization	≥65% average across cluster	nvidia-smi metrics	Weekly
5	Incident MTTR	<1 hour for P1, <4 hours for P2	Incident logs	Monthly
6	Successful rollbacks	100% rollback success rate	Deployment logs	Quarterly

Required Tools & Platforms

vLLM, Ollama, Docker, Kubernetes (K3s), Prometheus, Grafana, NVIDIA CUDA, Woodpecker CI, Harbor, Linux

Growth Path

MLOps Engineer → Senior MLOps → Infrastructure Lead → Head of Platform

24. API / PLATFORM ENGINEER

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	API / Platform Engineer
Department:	Engineering
Reporting To:	CTO
Direct Reports:	None
Location:	Lagos, Nigeria

Key Responsibilities

1. Design and maintain Apache APISIX gateway (routing, rate limiting, auth)
2. Build and document public APIs (OpenAPI/Swagger)
3. Implement API versioning and backward compatibility
4. Design inter-service communication (REST, gRPC, events)
5. Build developer portal with documentation and SDK generation
6. Implement API monetization (tiers, usage metering)
7. Manage Keycloak integration (OAuth2, API keys, JWT)
8. Performance optimization (caching, compression, pooling)

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	API uptime	≥99.9%	APISIX monitoring	Monthly
2	API response time (P95)	<200ms (excluding AI calls)	Prometheus	Weekly
3	API documentation coverage	100% of public endpoints	Documentation audit	Quarterly
4	Developer onboarding time	<1 day to first API call	Developer feedback	Quarterly
5	Breaking changes	Zero unannounced breaking changes	Version tracking	Quarterly
6	External API adoption	Growth targets per quarter	Analytics dashboard	Quarterly

Required Tools & Platforms

Apache APISIX, Keycloak, Node.js, Python, PostgreSQL, Redis, NATS/Kafka, Docker, OpenAPI/Swagger, Strapi

Growth Path

Platform Engineer → Senior Platform Engineer → Platform Architect → Head of Platform

---

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

---

25. AI PRODUCT MANAGER

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	AI Product Manager
Department:	Product & Business
Reporting To:	CEO
Direct Reports:	Developer Advocate, Technical Writer
Location:	Lagos, Nigeria

Key Responsibilities

1. Define AI product roadmap across all 10 PECH verticals
2. Prioritize AI features by user impact, revenue, and feasibility
3. Design AI subscription tiers (free, basic, pro, enterprise)
4. Write PRDs for AI features
5. Analyze AI usage metrics and optimize feature adoption
6. Research competitor AI features and emerging capabilities
7. Manage beta programs and user feedback loops
8. Collaborate with engineering on feasibility and timelines

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	AI feature adoption	≥30% of active users try AI features	Analytics	Monthly
2	AI subscription revenue	Growth targets per quarter	Revenue reports	Quarterly
3	Feature delivery	≥80% of roadmap delivered on time	Sprint tracking	Quarterly
4	User satisfaction (AI)	≥4.0/5.0 CSAT for AI features	User surveys	Monthly
5	Paid conversion rate	≥5% free-to-paid for AI tiers	Billing analytics	Monthly
6	PRD quality	Zero requirements gaps post-launch	Post-mortem reviews	Quarterly

Required Tools & Platforms

Jira/Linear, Figma, SQL, Apache Superset, Notion, Miro, Google Workspace

Growth Path

AI Product Manager → Senior PM → VP Product → Chief Product Officer

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

26. DEVELOPER ADVOCATE

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	Developer Advocate
Department:	Product & Business
Reporting To:	AI Product Manager
Direct Reports:	None
Location:	Lagos, Nigeria

Key Responsibilities

1. Create and maintain API documentation
2. Build sample applications and integration guides
3. Write technical blog posts and tutorials
4. Manage developer community (Discord/Slack, GitHub)
5. Speak at conferences and meetups
6. Collect developer feedback for product/engineering
7. Create and maintain SDKs (JavaScript, Python)
8. Build and maintain developer portal

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Developer registrations	Growth targets per quarter	Portal analytics	Quarterly
2	API documentation NPS	≥8/10	Developer surveys	Quarterly
3	Content output	≥4 blog posts + 2 tutorials per month	Content tracker	Monthly
4	Community engagement	≥100 active community members	Community metrics	Quarterly
5	Conference talks	≥2 per quarter	Event tracker	Quarterly

6	SDK adoption	Growth in SDK downloads	Package manager stats	Monthly

Required Tools & Platforms

Strapi, Swagger/Redoc, Git/GitHub, Notion, Google Workspace, video tools

Growth Path

Developer Advocate → Senior DevRel → Head of Developer Relations

---

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

27. TECHNICAL WRITER

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	Technical Writer
Department:	Product & Business
Reporting To:	AI Product Manager
Direct Reports:	None
Location:	Lagos, Nigeria

Key Responsibilities

1. Write and maintain API documentation for all PECH services
2. Create user guides for AI features
3. Write installation and setup guides for solar products and IoT devices
4. Create training materials for installer network and field agents
5. Maintain internal engineering documentation
6. Edit and proofread all external-facing content
7. Create video scripts for product tutorials
8. Manage documentation versioning and release notes

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Documentation coverage	100% of shipped features documented	Documentation audit	Monthly
2	Documentation accuracy	<2 error reports per month	Error tracking	Monthly
3	Content freshness	Updated within 48h of feature changes	Version tracking	Monthly

4	User satisfaction	≥4.0/5.0 on docs helpfulness	User surveys	Quarterly
5	Output volume	≥8 documents/guides per month	Content tracker	Monthly
6	Review turnaround	<24h for review requests	Request tracking	Monthly

Required Tools & Platforms

Markdown, Git, Strapi, Notion, Google Workspace, Figma (screenshots), Loom (video)

Growth Path

Technical Writer → Senior Writer → Documentation Lead → Head of Content

---

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

---

28. INSTALLER TRAINING & NETWORK MANAGER

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	Installer Training & Network Manager
Department:	Operations
Reporting To:	Market Operations Manager
Direct Reports:	Certified installer network
Location:	Lagos, Nigeria (Field + Office)

Key Responsibilities

1. Recruit and onboard solar installers across Lagos and expansion cities
2. Develop installer training curriculum (technical + customer service)
3. Manage AI-powered training platform (video courses, certifications)
4. Conduct quality audits of completed installations
5. Maintain installer performance metrics
6. Manage certification and re-certification process
7. Coordinate with solar product team on new product training
8. Build partnerships with technical schools and vocational centers

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Active certified installers	Growth per phase targets	Installer database	Quarterly

2	Installation quality score	≥4.5/5.0 customer rating	Customer feedback	Monthly
3	Certification pass rate	≥80% first attempt	Training platform	Monthly
4	Warranty claim rate	<3% of installations	Warranty system	Quarterly
5	Training completion	≥90% of onboarded installers	LMS tracking	Monthly
6	Geographic coverage	Active installers in target LGAs	Coverage map	Quarterly

Required Tools & Platforms

ThingsBoard, Google Workspace, LMS platform, PECH installer app, Google Maps

Growth Path

Training Manager → Head of Installer Operations → VP Operations

---

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

---

29. FINTECH OPERATIONS / AGENT NETWORK MANAGER

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Employment Contract dated: _____

Field	Details
Job Title:	Fintech Operations / Agent Network Manager
Department:	Operations
Reporting To:	CEO / Payments Product Manager
Direct Reports:	Agent network
Location:	Lagos, Nigeria

Key Responsibilities

1. Build and manage the agent banking network
2. Monitor agent performance, liquidity, and fraud indicators
3. Ensure PSSP and CBN regulatory compliance
4. Manage KYC/KYB processes for agents and customers
5. Coordinate with fraud detection team on suspicious transactions
6. Manage payment gateway integrations (Paystack, Flutterwave)
7. Handle customer complaints related to payments
8. Report on fintech metrics (transaction volume, revenue)

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Active agents	Growth per phase targets	Agent database	Monthly

2	Transaction success rate	≥99%	Payment system logs	Daily/Weekly
3	Fraud incident rate	<0.1% of transactions	Fraud detection system	Monthly
4	Agent liquidity compliance	≥95% agents meet float requirements	Fineract reports	Weekly
5	KYC completion rate	100% of active customers/agents	KYC system	Monthly
6	Regulatory compliance	Zero CBN/NDPC violations	Compliance audits	Quarterly
7	Customer complaint resolution	<24h average resolution	Chatwoot tickets	Monthly

Required Tools & Platforms

Apache Fineract, PECH admin dashboard, Paystack/Flutterwave, compliance tools, Chatwoot

Growth Path

Fintech Ops Manager → Head of Fintech Operations → VP Financial Services

---

Employee Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____

---

30. AI/ML ENGINEERING INTERN

SCHEDULE B — JOB DESCRIPTION AND KEY PERFORMANCE INDICATORS

Attached to Internship Agreement dated: _____

Field	Details
Job Title:	AI/ML Engineering Intern
Department:	Engineering (AI/ML Team)
Reporting To:	AI/ML Engineer
Direct Reports:	None
Location:	Lagos, Nigeria

Key Responsibilities

1. Assist with data preparation for RAG pipelines and model fine-tuning
2. Test and evaluate model performance across PECH use cases
3. Build sample AI features under supervision (chatbot, OCR, recommendations)
4. Document AI workflows and create testing scripts
5. Learn Docker, Linux, and GPU infrastructure management
6. Contribute to AI documentation and code comments
7. Participate in code reviews and engineering meetings

Key Performance Indicators (KPIs)

#	KPI	Target	Measurement Method	Review Period
1	Learning milestone completion	≥80% of quarterly learning plan	Mentor evaluation	Monthly
2	Task completion	≥90% of assigned tasks completed on time	Sprint tracking	Bi-weekly
3	Documentation contributions	≥2 docs/guides per month	Content tracker	Monthly
4	Code quality	Pass code review on ≥80% of PRs first attempt	GitHub metrics	Monthly
5	Attendance & engagement	≥95% attendance, active participation	Manager feedback	Monthly

Required Tools & Platforms

Python, PyTorch, Docker, Git, Ollama, LangChain, Qdrant, Linux

Growth Path

AI/ML Intern → Junior AI/ML Engineer → AI/ML Engineer

Intern Signature: _____ **Date:** ___/___/_____

Employer Signature: _____ **Date:** ___/___/_____
