PECH GROUP HOLDINGS LTD

Technology & Infrastructure Enablers for Africa

ABOUT PECH GROUP HOLDINGS LTD

PECH Group Holdings Ltd is a Lagos-based technology company building technology infrastructure for Africa. Our ecosystem spans **IoT-enabled solar energy management**, **marketplace platforms**, **logistics networks**, and **financial services (PSSP)** — all designed to solve real problems for African businesses and consumers.

We are scaling from a founding team of 5 to a 37-person organization over 24 months across 6 hiring phases. We are looking for talented, mission-driven individuals who want to build technology that matters.

Our Tech Stack: React/Next.js, React Native, Node.js, Python, PostgreSQL, Redis, MQTT, ESP32/STM32, Docker, Kubernetes, CI/CD pipelines, and more. **AI/ML Stack:** Qwen2.5, Whisper, PaddleOCR, vLLM, Ollama, LangChain, LangGraph, Qdrant, PyTorch, XGBoost, Apache APISIX, Keycloak, Apache Fineract, Medusa.js, ThingsBoard, Apache Superset.

Our Values: - **Reliability** — We ship products that work. No excuses. - **Quality** — Good price for your money, no bad products. - **Africa-First** — We build for the African context, not copy-paste from Silicon Valley. - **Ownership** — Every team member owns their domain end-to-end.

1. ENGINEERING DEPARTMENT

1.1 CTO / FOUNDING TECHNICAL ARCHITECT

Field	Details
Role ID:	PECH-ENG-CTO-001
Department:	Engineering
Reports To:	CEO / Founder
Location:	Lagos, Nigeria (On-site + Remote flexibility)
Employment Type:	Full-Time + Equity
Hiring Phase:	Phase 1 (Months 1–4)
Compensation:	₦800,000/month + equity package

About the Role: As CTO, you will be the technical co-pilot of PECH Group Holdings. You will architect and lead the development of our entire platform ecosystem — from IoT firmware to cloud backend to mobile and web applications. This is a founding-level role with equity participation and direct input into company strategy.

Key Responsibilities: 1. Define and own the overall technical architecture across all PECH products (ERP, Marketplace, IoT, PSSP) 2. Lead, mentor, and grow the engineering team from 2 to 15+ engineers over 24 months 3. Make build vs. buy decisions and select technology stacks 4. Establish engineering processes: code reviews, CI/CD, testing standards, sprint planning 5. Architect scalable, secure systems compliant with Nigerian data protection (NDPA) and CBN regulations 6. Manage cloud infrastructure (AWS/Azure), DevOps pipelines, and system reliability 7. Contribute hands-on code during early phases, transitioning to architecture and leadership 8. Report technical progress to CEO and investors; participate in fundraising discussions

Required Qualifications: - B.Sc./B.Eng. in Computer Science, Software Engineering, or related field - 7+ years of professional software development experience - 3+ years in a technical leadership or architect role - Proven experience building and shipping production SaaS/platform products - Deep knowledge of at least 2: React/Next.js, Node.js, Python, React Native - Experience with PostgreSQL, Redis, message queues (MQTT/RabbitMQ) - Cloud architecture experience (AWS or Azure) - Experience managing engineering teams of 5+

Preferred Qualifications: - Experience with IoT systems, embedded firmware (ESP32/STM32) - Experience with payment systems or fintech (PSP, PSSP licensing) - Experience in African tech ecosystem - M.Sc. in Computer Science or MBA - Open-source contributions or technical blog presence

PECH Tech Stack Relevant to This Role: React/Next.js, React Native, Node.js, Python, PostgreSQL, MongoDB, Redis, MQTT, ESP32, AWS/Azure, Docker, Kubernetes, GitHub Actions, Sentry

---

1.2 FULL-STACK ENGINEER (ERP + WEB)

Field	Details
Role ID:	PECH-ENG-FS-001
Department:	Engineering
Reports To:	CTO
Location:	Lagos, Nigeria (Hybrid)
Employment Type:	Full-Time
Hiring Phase:	Phase 1 (Months 1–4)
Compensation:	₦400,000–450,000/month

About the Role: You will build and maintain PECH's internal ERP system and customer-facing web applications. This includes the admin dashboard, inventory management, order processing, and integration with IoT devices and payment systems.

Key Responsibilities: 1. Develop and maintain the PECH ERP system (inventory, orders, invoicing, reporting) 2. Build responsive web applications using React/Next.js with TypeScript 3. Design and implement RESTful APIs and GraphQL endpoints using Node.js 4. Integrate with third-party services (payment gateways, SMS, email) 5. Write database schemas, queries, and migrations (PostgreSQL) 6. Implement authentication, authorization, and role-based access control 7. Write unit tests, integration tests, and participate in code reviews 8. Collaborate with UI/UX designer on user-facing features

Required Qualifications: - B.Sc. in Computer Science, Software Engineering, or related field (or equivalent experience) - 3+ years of professional full-stack development experience - Proficiency in React/Next.js and TypeScript - Proficiency in Node.js (Express or NestJS) - Experience with PostgreSQL and at least one NoSQL database - Understanding of RESTful API design principles - Familiarity with Git, CI/CD, and agile development practices

Preferred Qualifications: - Experience with GraphQL - Experience with Redis, message queues - Experience with Docker and containerized deployments - Previous experience building ERP, CRM, or business management tools - Familiarity with Nigerian business operations (invoicing, tax, etc.)

PECH Tech Stack Relevant to This Role: React/Next.js, TypeScript, Node.js, Express/NestJS, PostgreSQL, MongoDB, Redis, Docker, GitHub Actions, Jest, Cypress

---

1.3 FULL-STACK ENGINEER (MOBILE)

Field	Details
Role ID:	PECH-ENG-MOB-001
Department:	Engineering
Reports To:	CTO
Location:	Lagos, Nigeria (Hybrid)
Employment Type:	Full-Time
Hiring Phase:	Phase 1 (Months 1–4)
Compensation:	₦400,000–450,000/month

About the Role: You will own the mobile experience for PECH's marketplace and IoT monitoring apps. Build cross-platform mobile applications that work seamlessly for Nigerian users — including offline support, low-bandwidth optimization, and USSD/SMS fallbacks.

Key Responsibilities: 1. Develop cross-platform mobile applications using React Native or Flutter 2. Build mobile APIs and backend services to support the mobile apps 3. Implement offline-first architecture for areas with poor connectivity 4. Integrate with IoT devices (Bluetooth, MQTT) for real-time monitoring 5. Implement push notifications, in-app messaging, and deep linking 6. Optimize for performance on low-end Android devices (common in Nigeria) 7. Publish and maintain apps on Google Play Store and Apple App Store 8. Collaborate with backend team on API contracts and data flow

Required Qualifications: - B.Sc. in Computer Science or related field (or equivalent experience) - 3+ years of mobile development experience - Proficiency in React Native or Flutter - Experience with Node.js or Python backend development - Understanding of mobile app architecture patterns (MVVM, Clean Architecture) - Experience publishing apps to Google Play Store - Familiarity with REST APIs and WebSocket/MQTT protocols

Preferred Qualifications: - Experience with Bluetooth/BLE for device communication - Experience with offline-first/sync architectures - Knowledge of USSD integration or SMS-based services - Experience optimizing for low-bandwidth African markets - Knowledge of mobile payment SDKs (Paystack, Flutterwave)

PECH Tech Stack Relevant to This Role: React Native/Flutter, TypeScript, Node.js, PostgreSQL, MQTT, Firebase, Bluetooth/BLE, Redux/MobX, Jest, Detox

---

1.4 FRONTEND DEVELOPER

Field	Details
Role ID:	PECH-ENG-FE-001
Department:	Engineering
Reports To:	CTO
Location:	Lagos, Nigeria (Hybrid)
Employment Type:	Full-Time
Hiring Phase:	Phase 2 (Months 5–8)
Compensation:	₦350,000–450,000/month

About the Role: You will craft beautiful, responsive, and performant user interfaces for PECH's web platform — including the marketplace, customer dashboard, IoT monitoring panels, and internal tools. You care about pixel-perfect designs, accessibility, and user experience.

Key Responsibilities: 1. Build and maintain responsive web interfaces using React/Next.js and TypeScript 2. Translate Figma/design mockups into pixel-perfect, accessible UI components 3. Implement client-side state management (Redux, Zustand, or React Context) 4. Build reusable component libraries following atomic design principles 5. Optimize web performance (Core Web Vitals, lazy loading, code splitting) 6. Implement data visualization for IoT dashboards (charts, real-time graphs) 7. Write unit and integration tests for frontend components 8. Collaborate closely with UI/UX designer and backend engineers

Required Qualifications: - B.Sc. in Computer Science or related field (or equivalent experience) - 2+ years of professional frontend development experience - Strong proficiency in React.js and TypeScript - Expert-level CSS/SCSS (responsive design, Flexbox, Grid, animations) - Experience with Next.js (SSR, SSG, API routes) - Understanding of web accessibility standards (WCAG) - Familiarity with frontend testing (Jest, React Testing Library, Cypress)

Preferred Qualifications: - Experience with Tailwind CSS or Styled Components - Experience with data visualization libraries (D3.js, Chart.js, Recharts) - Experience with WebSocket or MQTT for real-time data - Knowledge of SEO best practices - Portfolio of shipped web applications

PECH Tech Stack Relevant to This Role: React/Next.js, TypeScript, Tailwind CSS, Zustand/Redux, Chart.js/Recharts, Jest, Cypress, Figma, Vercel

---

1.5 BACKEND DEVELOPER

Field	Details
Role ID:	PECH-ENG-BE-001

Department:	Engineering
Reports To:	CTO
Location:	Lagos, Nigeria (Hybrid)
Employment Type:	Full-Time
Hiring Phase:	Phase 2 (Months 5–8)
Compensation:	₦350,000–450,000/month

About the Role: You will build the backbone of PECH's platform — the APIs, databases, integrations, and services that power everything from marketplace transactions to IoT data ingestion to payment processing. You care about clean architecture, security, and scalability.

Key Responsibilities: 1. Design, build, and maintain RESTful and GraphQL APIs using Node.js 2. Design and optimize database schemas (PostgreSQL, MongoDB) 3. Build microservices and event-driven architectures for scalability 4. Integrate with payment gateways (Paystack, Flutterwave), SMS providers, and third-party APIs 5. Implement authentication, authorization (JWT, OAuth2), and API security 6. Build data pipelines for IoT sensor data ingestion and processing 7. Write comprehensive API documentation (OpenAPI/Swagger) 8. Implement logging, monitoring, and alerting (Sentry, CloudWatch)

Required Qualifications: - B.Sc. in Computer Science or related field (or equivalent experience) - 3+ years of professional backend development experience - Strong proficiency in Node.js (Express, NestJS, or Fastify) - Deep experience with PostgreSQL (query optimization, indexing, migrations) - Experience with API design patterns (REST, GraphQL) - Understanding of authentication/authorization (JWT, OAuth2, RBAC) - Familiarity with Docker and containerized deployments

Preferred Qualifications: - Experience with Python (FastAPI/Django) as secondary language - Experience with Redis, message brokers (RabbitMQ, Kafka) - Experience with MQTT protocol for IoT data - Knowledge of Nigerian payment systems (NIP, NIBSS, PSSP framework) - Experience with cloud services (AWS Lambda, SQS, S3)

PECH Tech Stack Relevant to This Role: Node.js, Express/NestJS, TypeScript, PostgreSQL, MongoDB, Redis, MQTT, Docker, AWS (Lambda, SQS, S3), Sentry, Jest

---

1.6 IoT / EMBEDDED SYSTEMS ENGINEER

Field	Details
Role ID:	PECH-ENG-IOT-001
Department:	Engineering
Reports To:	CTO
Location:	Lagos, Nigeria (On-site — Lab required)
Employment Type:	Full-Time
Hiring Phase:	Phase 2 (Months 5–8)
Compensation:	₦400,000/month

About the Role: You will design and develop the firmware and hardware integration layer for PECH's IoT products — primarily solar energy monitoring systems, smart meters, and environmental sensors. You will bridge the gap between physical hardware and cloud platforms.

Key Responsibilities: 1. Develop firmware for ESP32/STM32 microcontrollers for solar monitoring devices 2. Design sensor data acquisition systems (voltage, current, temperature, irradiance) 3. Implement MQTT-based communication between IoT devices and cloud backend 4. Build over-the-air (OTA) firmware update systems 5. Design PCB schematics and prototype hardware (working with external manufacturers) 6.

Implement edge computing logic for local data processing and alerts 7. Develop device provisioning and management systems 8. Ensure device security (encrypted communication, secure boot, key management)

Required Qualifications: - B.Sc./B.Eng. in Electrical Engineering, Computer Engineering, or Mechatronics - 3+ years of embedded systems development experience - Proficiency in C/C++ for microcontroller programming - Hands-on experience with ESP32 or STM32 platforms - Experience with MQTT, HTTP, and serial communication protocols - Understanding of analog/digital sensor interfaces (ADC, I2C, SPI, UART) - Experience with oscilloscopes, multimeters, and lab equipment

Preferred Qualifications: - Experience with solar energy systems or power electronics - Experience with PCB design (KiCad, Eagle, Altium) - Knowledge of LoRaWAN, GSM/4G modem integration for remote areas - Experience with FreeRTOS or other RTOS - Python scripting for test automation and data analysis

PECH Tech Stack Relevant to This Role: ESP32, STM32, C/C++, MQTT, FreeRTOS, Python, KiCad, Arduino IDE/PlatformIO, AWS IoT Core, Node-RED

1.7 DEVOPS ENGINEER

Field	Details
Role ID:	PECH-ENG-DO-001
Department:	Engineering
Reports To:	CTO
Location:	Lagos, Nigeria (Hybrid / Remote possible)
Employment Type:	Full-Time
Hiring Phase:	Phase 2 (Months 5–8)
Compensation:	₦350,000/month

About the Role: You will build and maintain the infrastructure that keeps PECH's platform running — CI/CD pipelines, cloud infrastructure, monitoring, security, and deployment automation. You are the person who makes sure deployments are boring (in the best way).

Key Responsibilities: 1. Design and maintain CI/CD pipelines (GitHub Actions, Jenkins) 2. Manage cloud infrastructure on AWS/Azure (EC2, RDS, S3, Lambda, VPC) 3. Implement Infrastructure as Code (Terraform, CloudFormation, or Pulumi) 4. Set up monitoring, alerting, and logging (Sentry, CloudWatch, Grafana, ELK) 5. Manage Docker containers and orchestration (Docker Compose, Kubernetes) 6. Implement security best practices (SSL/TLS, secrets management, network segmentation) 7. Automate database backups, disaster recovery, and scaling policies 8. Manage domain, DNS, CDN, and SSL certificates

Required Qualifications: - B.Sc. in Computer Science, IT, or related field (or equivalent experience) - 3+ years of DevOps or infrastructure engineering experience - Strong experience with AWS or Azure cloud services - Proficiency with Docker and container orchestration - Experience with CI/CD pipeline design and maintenance - Strong Linux system administration skills - Experience with Infrastructure as Code (Terraform or CloudFormation) - Understanding of networking (TCP/IP, DNS, load balancing, firewalls)

Preferred Qualifications: - Experience with Kubernetes (EKS/AKS) - Experience with monitoring tools (Prometheus, Grafana, Datadog) - Knowledge of database administration (PostgreSQL, MongoDB, Redis) - Experience with IoT infrastructure (MQTT brokers, device management) - AWS or Azure certification

PECH Tech Stack Relevant to This Role: AWS/Azure, Docker, Kubernetes, Terraform, GitHub Actions, Nginx, PostgreSQL, Redis, Sentry, Grafana, CloudWatch

---

1.8 JUNIOR SOFTWARE ENGINEER

Field	Details
Role ID:	PECH-ENG-JR-001
Department:	Engineering
Reports To:	CTO / Senior Engineer
Location:	Lagos, Nigeria (On-site)
Employment Type:	Full-Time
Hiring Phase:	Phase 4 (Months 13–16)
Compensation:	₦250,000/month

About the Role: You are an early-career engineer hungry to learn and build. You will work alongside senior engineers on real production features — contributing code, fixing bugs, writing tests, and gradually taking ownership of components. PECH invests heavily in mentoring junior talent.

Key Responsibilities: 1. Write clean, well-tested code for assigned features and bug fixes 2. Participate in code reviews (both reviewing and being reviewed) 3. Write unit tests and integration tests for new and existing code 4. Fix bugs and respond to production issues under guidance 5. Document code and technical decisions 6. Participate in sprint planning, standups, and retrospectives 7. Learn and apply PECH's coding standards and best practices 8. Pair program with senior engineers on complex features

Required Qualifications: - B.Sc. in Computer Science, Software Engineering, or related field (recent graduate OK) - 0–2 years of professional experience (bootcamp, internship, or personal projects count) - Solid understanding of at least one programming language (JavaScript, Python, or C++) - Basic knowledge of web development (HTML, CSS, JavaScript) - Understanding of version control (Git) - Eagerness to learn and strong problem-solving skills

Preferred Qualifications: - Familiarity with React or any frontend framework - Familiarity with Node.js or Python backend - Personal projects or open-source contributions on GitHub - Bootcamp or structured training program completion - Basic understanding of databases (SQL)

PECH Tech Stack Relevant to This Role: JavaScript/TypeScript, React, Node.js, PostgreSQL, Git, Docker (basics), Jest

1.9 SENIOR DATA ENGINEER

Field	Details
Role ID:	PECH-ENG-SDE-001
Department:	Engineering
Reports To:	CTO
Location:	Lagos, Nigeria (Hybrid)
Employment Type:	Full-Time
Hiring Phase:	Phase 5 (Months 17–20)
Compensation:	₦500,000/month

About the Role: You will build the data infrastructure that powers PECH's analytics, reporting, and machine

learning capabilities. From IoT sensor data pipelines to marketplace transaction analytics to financial reporting — you will ensure data flows reliably from source to insight.

Key Responsibilities: 1. Design and build scalable data pipelines (ETL/ELT) for IoT, marketplace, and financial data 2. Build and maintain a data warehouse (Snowflake, Redshift, or BigQuery) 3. Implement real-time data streaming for IoT sensor data (Kafka, Kinesis) 4. Create data models and schemas for analytics and reporting 5. Build automated reporting dashboards and data APIs 6. Implement data quality monitoring, validation, and alerting 7. Collaborate with Data Analyst and Product team on metrics and KPI definitions 8. Ensure data governance, privacy, and compliance with NDPA

Required Qualifications: - B.Sc. in Computer Science, Data Engineering, or related field - 5+ years of data engineering or software engineering experience - Strong SQL skills (complex queries, optimization, window functions) - Experience with Python for data processing (pandas, PySpark, Airflow) - Experience building ETL/ELT pipelines at scale - Experience with cloud data services (AWS Glue, Redshift, or equivalent) - Understanding of data modeling and warehousing concepts

Preferred Qualifications: - Experience with real-time streaming (Kafka, Kinesis, MQTT) - Experience with IoT data or time-series databases (InfluxDB, TimescaleDB) - Experience with dbt (data build tool) - Knowledge of machine learning pipelines - Experience with data governance and compliance frameworks

PECH Tech Stack Relevant to This Role: Python, SQL, PostgreSQL, AWS (Glue, Redshift, S3, Kinesis), Apache Kafka, Airflow, dbt, Docker, Grafana

---

1.10 QA / TEST ENGINEER

Field	Details
Role ID:	PECH-ENG-QA-001
Department:	Engineering
Reports To:	CTO
Location:	Lagos, Nigeria (Hybrid)
Employment Type:	Full-Time
Hiring Phase:	Phase 4 (Months 13–16)
Compensation:	₦300,000–350,000/month

About the Role: You are the guardian of quality at PECH. You will design and execute test strategies across web, mobile, IoT, and API layers — ensuring that every release meets our standards of reliability before it reaches users.

Key Responsibilities: 1. Design comprehensive test strategies (unit, integration, E2E, performance) 2. Write and maintain automated test suites (Jest, Cypress, Detox) 3. Perform manual exploratory testing for complex user flows 4. Set up and maintain test environments and test data management 5. Create and manage bug reports with clear reproduction steps 6. Participate in code reviews with a quality-focused lens 7. Monitor production error rates and regression trends (Sentry) 8. Collaborate with developers to establish testable code patterns

Required Qualifications: - B.Sc. in Computer Science or related field (or equivalent experience) - 2+ years of QA or test engineering experience - Experience with test automation frameworks (Jest, Cypress, Selenium, or similar) - Understanding of software testing methodologies (black box, white box, regression) - Experience with API testing tools (Postman, REST Client) - Basic programming skills in JavaScript or Python - Familiarity with CI/CD and automated test integration

Preferred Qualifications: - Experience with mobile testing (React Native/Flutter) - Experience with performance testing tools (k6, JMeter) - Experience with IoT device testing - ISTQB certification or equivalent

- Experience with test management tools (TestRail, Zephyr)

PECH Tech Stack Relevant to This Role: Jest, Cypress, Detox, Postman, k6, Sentry, GitHub Actions, Docker, JavaScript/TypeScript, Python

---

1.11 AI/ML ENGINEER

Field	Details
Role ID:	PECH-ENG-AI-001
Department:	Engineering
Reports To:	CTO
Location:	Lagos, Nigeria (Hybrid) or Remote
Employment Type:	Full-Time
Hiring Phase:	Phase 2 (Months 5–8)
Compensation:	₦600,000–1,000,000/month

About the Role: You will be the core AI/ML engineer responsible for deploying, fine-tuning, and integrating large language models (LLMs) and traditional ML models across all PECH verticals. You will build the AI Core that powers chatbots, recommendations, vision, speech, and predictive analytics across the entire ecosystem.

Key Responsibilities: 1. Deploy and manage self-hosted LLMs (Qwen2.5, Mistral, Phi) using Ollama and vLLM 2. Build and maintain RAG (Retrieval-Augmented Generation) pipelines using LangChain, Qdrant, and embedding models 3. Fine-tune models on PECH business data using LoRA/QLoRA (PEFT library) 4. Integrate AI capabilities into microservices (chatbot, OCR, speech, recommendations) 5. Optimize model inference (quantization, batching, GPU memory management) 6. Build AI agents using LangGraph for multi-step tasks (solar design, financial analysis) 7. Implement fraud detection, dynamic pricing, and predictive maintenance ML models 8. Monitor model performance, A/B test model versions, and track AI metrics

Required Qualifications: - B.Sc./M.Sc. in Computer Science, AI/ML, Mathematics, or related field - 3+ years of professional ML/AI engineering experience - Strong Python skills (PyTorch, Transformers, scikit-learn) - Experience deploying LLMs (fine-tuning, quantization, serving) - Experience with NLP tasks (text classification, NER, embeddings, RAG) - Familiarity with vector databases (Qdrant, Milvus, or similar) - Experience with Docker and Linux server administration - Understanding of GPU computing (CUDA, VRAM management)

Preferred Qualifications: - Experience with vLLM, Ollama, or TensorRT for model serving - Experience with computer vision (object detection, image classification) - Experience with speech models (Whisper, TTS systems) - Published papers or open-source ML contributions - Experience in African tech or fintech

PECH Tech Stack Relevant to This Role: Qwen2.5, Phi-4, Mistral, Whisper, PaddleOCR, RT-DETR, vLLM, Ollama, LangChain, LangGraph, Qdrant, PyTorch, Transformers, PEFT, XGBoost, LightGBM, Prophet, Docker, NVIDIA CUDA

1.12 AI KNOWLEDGE / DATA ENGINEER

Field	Details
Role ID:	PECH-ENG-AK-001
Department:	Engineering
Reports To:	CTO / AI/ML Engineer

Location:	Lagos, Nigeria (Hybrid)
Employment Type:	Full-Time
Hiring Phase:	Phase 2 (Months 5–8)
Compensation:	₦400,000–600,000/month

About the Role: You will build and maintain the data pipelines that feed PECH's AI systems. This includes ingesting business data from all verticals (products, support tickets, IoT telemetry, financial records), processing it into embeddings, and storing it in vector databases for RAG retrieval. You ensure the AI has access to accurate, up-to-date knowledge.

Key Responsibilities: 1. Build ETL pipelines using Apache Airflow to ingest data from all PECH platforms 2. Design and maintain the RAG knowledge base (document chunking, embedding, indexing) 3. Manage Qdrant vector database (indexing, filtering, performance tuning) 4. Create data quality checks and monitoring for AI training data 5. Build data connectors for ERPNext, Medusa, Chatwoot, ThingsBoard, and Fineract 6. Maintain PostgreSQL database schemas for AI/ML feature stores 7. Implement data anonymization and NDPA compliance for AI training data 8. Support model fine-tuning with curated training datasets

Required Qualifications: - B.Sc. in Computer Science, Data Science, or related field - 2+ years of data engineering experience - Strong Python and SQL skills - Experience with data pipeline tools (Airflow, Prefect, or similar) - Experience with PostgreSQL and at least one NoSQL database - Familiarity with data modeling and ETL best practices - Understanding of embeddings and vector databases (conceptual)

Preferred Qualifications: - Experience with Apache Airflow specifically - Experience with NLP data preparation (tokenization, chunking) - Knowledge of Qdrant, ChromaDB, or Milvus - Experience with DuckDB for analytics - Data governance or compliance experience

PECH Tech Stack Relevant to This Role: Python, PostgreSQL, Apache Airflow, Qdrant, DuckDB, Redis, LangChain, Docker, Sentence Transformers, Pandas, Apache Superset

---

P E C H G R O U P H O L D I N G S L T D

1.13 MLOps ENGINEER

Field	Details
Role ID:	PECH-ENG-MLOPS-001
Department:	Engineering
Reports To:	CTO
Location:	Lagos, Nigeria (Hybrid) or Remote
Employment Type:	Full-Time
Hiring Phase:	Phase 3 (Months 9–14)
Compensation:	₦500,000–800,000/month

About the Role: You will own the production infrastructure for PECH's AI models. This includes model serving (vLLM cluster), monitoring, scaling, CI/CD for model deployments, and ensuring high availability of AI services across all 10 verticals.

Key Responsibilities: 1. Manage vLLM production cluster (multi-model serving, load balancing) 2. Build CI/CD pipelines for model deployment (automated testing, staging, production) 3. Monitor model performance (latency, throughput, accuracy drift) 4. Implement auto-scaling for AI services based on

demand 5. Manage GPU resource allocation across models 6. Set up model versioning, A/B testing, and rollback procedures 7. Optimize infrastructure costs (cloud GPU vs local, spot instances) 8. Maintain Kubernetes (K3s) deployment for AI workloads

Required Qualifications: - B.Sc. in Computer Science, DevOps, or related field - 3+ years of DevOps/MLOps experience - Strong Docker and Kubernetes experience - Experience with GPU-based infrastructure (NVIDIA, CUDA) - Linux server administration (Ubuntu) - CI/CD pipeline design (GitHub Actions, Woodpecker, Jenkins) - Monitoring tools (Prometheus, Grafana) - Scripting (Python, Bash)

Preferred Qualifications: - Experience with vLLM, Triton Inference Server, or TensorRT - Experience managing ML model serving at scale - Knowledge of NVIDIA Container Toolkit - Experience with cloud GPU providers (RunPod, Lambda, AWS) - Terraform or Ansible for infrastructure-as-code

PECH Tech Stack Relevant to This Role: vLLM, Ollama, Docker, Kubernetes (K3s), Prometheus, Grafana, NVIDIA CUDA, GitHub Actions, Woodpecker CI, Harbor, Linux, Python, Bash

---

1.14 API / PLATFORM ENGINEER

Field	Details
Role ID:	PECH-ENG-API-001
Department:	Engineering
Reports To:	CTO
Location:	Lagos, Nigeria (Hybrid)
Employment Type:	Full-Time
Hiring Phase:	Phase 2 (Months 5–8)
Compensation:	₦450,000–700,000/month

About the Role: You will design and maintain the API gateway (Apache APISIX) and microservice architecture that connects all 78 PECH services. You will build the developer platform that enables external developers to integrate with PECH's ecosystem, including AI APIs, marketplace APIs, and fintech APIs.

Key Responsibilities: 1. Design and maintain the API gateway (Apache APISIX) — routing, rate limiting, auth 2. Build and document public APIs (OpenAPI/Swagger) for external developers 3. Implement API versioning, deprecation, and backward compatibility 4. Design inter-service communication patterns (REST, gRPC, event-driven) 5. Build developer portal with API documentation and SDK generation 6. Implement API monetization (subscription tiers, usage metering) 7. Manage Keycloak integration (OAuth2, API keys, JWT validation) 8. Performance optimization (caching, compression, connection pooling)

Required Qualifications: - B.Sc. in Computer Science or related field - 3+ years of backend engineering experience - Strong Node.js and/or Python skills - Experience designing RESTful APIs at scale - Experience with API gateways (APISIX, Kong, Traefik, or similar) - Knowledge of authentication/authorization (OAuth2, JWT, API keys) - Experience with PostgreSQL and Redis - Docker and microservice architecture experience

Preferred Qualifications: - Experience with Apache APISIX specifically - Experience building developer platforms or API products - gRPC experience - Event-driven architecture (Kafka, NATS, RabbitMQ) - API documentation tooling (Swagger, Redoc, Stoplight)

PECH Tech Stack Relevant to This Role: Apache APISIX, Keycloak, Node.js, Python, PostgreSQL, Redis, NATS/Kafka, Docker, Kubernetes, OpenAPI/Swagger, Strapi (developer docs)

---

2. DESIGN DEPARTMENT

2.1 UI/UX DESIGNER

Field	Details
Role ID:	PECH-DES-UX-001
Department:	Design
Reports To:	CTO (initially), Product Manager (later)
Location:	Lagos, Nigeria (Hybrid)
Employment Type:	Full-Time or Contract
Hiring Phase:	Phase 2 (Months 5–8)
Compensation:	₦300,000–400,000/month

About the Role: You will define the visual identity and user experience of all PECH products — from the marketplace app to IoT dashboards to internal tools. You think mobile-first, design for Nigerian users (including low-literacy and low-bandwidth scenarios), and ship Figma files that developers love.

Key Responsibilities: 1. Create wireframes, high-fidelity mockups, and interactive prototypes in Figma 2. Design mobile-first interfaces for marketplace, IoT monitoring, and logistics apps 3. Conduct user research with Nigerian market users (interviews, surveys, usability tests) 4. Build and maintain a PECH design system (components, colors, typography, spacing) 5. Design for accessibility (WCAG 2.1 AA) and low-literacy users 6. Create marketing visuals, presentations, and brand materials 7. Collaborate closely with frontend developers on implementation fidelity 8. Iterate designs based on user feedback and analytics data

Required Qualifications: - 2+ years of UI/UX design experience with shipped products - Expert proficiency in Figma (components, auto-layout, prototyping, variants) - Strong portfolio demonstrating mobile app and web dashboard design - Understanding of user-centered design principles and design thinking - Experience with responsive design and design systems - Knowledge of accessibility standards (WCAG)

Preferred Qualifications: - Experience designing for African or emerging market users - Experience with user research and usability testing - Knowledge of HTML/CSS (for developer handoff precision) - Experience with motion design (Lottie, After Effects) - Experience designing data dashboards (charts, graphs, real-time displays) - Illustration or icon design skills

Tools: Figma, FigJam, Adobe Creative Suite, Maze/Hotjar (user testing), Notion, Miro

3. PRODUCT & BUSINESS

3.1 PAYMENTS PRODUCT MANAGER

Field	Details
Role ID:	PECH-BIZ-PPM-001
Department:	Product & Business
Reports To:	CEO
Location:	Lagos, Nigeria (On-site)

Employment Type:	Full-Time
Hiring Phase:	Phase 3 (Months 9–12)
Compensation:	₦600,000/month

About the Role: You will own the product strategy and execution for PECH's payment and financial services products. This includes building the payment infrastructure for the marketplace, managing PSSP licensing compliance, and designing fintech products for Nigerian SMEs. Deep knowledge of the Nigerian payments ecosystem is essential.

Key Responsibilities: 1. Define product roadmap for PECH's payment services (marketplace payments, bill payments, transfers) 2. Manage PSSP/PSP licensing process with CBN and relevant regulators 3. Design payment flows compliant with CBN, NIBSS, and NIP regulations 4. Work with engineering to build secure, PCI-DSS compliant payment systems 5. Negotiate and manage relationships with payment partners (Paystack, Flutterwave, banks) 6. Define and track payment KPIs (transaction success rate, settlement time, fraud rate) 7. Conduct competitive analysis of Nigerian fintech landscape 8. Manage product backlog using agile methodology

Required Qualifications: - B.Sc. in Business, Finance, Computer Science, or related field - 5+ years of product management experience, with 3+ in fintech/payments - Deep understanding of Nigerian payments ecosystem (NIP, NIBSS, CBN regulations) - Experience with PSP/PSSP licensing or regulatory compliance - Strong analytical skills (SQL, Excel, data-driven decision making) - Experience with agile/scrum product management - Excellent stakeholder management and communication skills

Preferred Qualifications: - MBA or relevant professional certification - Experience at a Nigerian fintech (Paystack, Flutterwave, Interswitch, etc.) - Understanding of PCI-DSS compliance - Experience with marketplace payment models (escrow, split payments) - Knowledge of USSD and agent banking

Tools: Jira/Linear, SQL, Mixpanel/Amplitude, Figma (for wireframes), Google Sheets, Confluence

3.2 DATA ANALYST

Field	Details
Role ID:	PECH-BIZ-DA-001
Department:	Product & Business
Reports To:	Payments Product Manager / CTO
Location:	Lagos, Nigeria (Hybrid)
Employment Type:	Full-Time
Hiring Phase:	Phase 3 (Months 9–12)
Compensation:	₦350,000/month

About the Role: You will turn PECH's data into actionable insights. From marketplace GMV trends to IoT device performance to customer behavior patterns — you will build dashboards, run analyses, and provide data-driven recommendations that shape product and business decisions.

Key Responsibilities: 1. Build and maintain business intelligence dashboards (marketplace, IoT, financial) 2. Analyze user behavior, conversion funnels, and retention metrics 3. Produce weekly/monthly reports on key business metrics and KPIs 4. Run ad-hoc analyses to support product, marketing, and operations decisions 5. Design and analyze A/B tests and experiments 6. Monitor data quality and flag anomalies 7. Collaborate with Data Engineer on data pipeline requirements 8. Present insights to leadership team with clear recommendations

Required Qualifications: - B.Sc. in Statistics, Mathematics, Computer Science, Economics, or related field -

2+ years of data analysis experience - Strong SQL skills (joins, subqueries, window functions, CTEs) - Proficiency in Python (pandas, matplotlib) or R for analysis - Experience with BI tools (Metabase, Tableau, Power BI, or Looker) - Strong Excel/Google Sheets skills (pivot tables, VLOOKUP, formulas) - Ability to communicate findings to non-technical stakeholders

Preferred Qualifications: - Experience with statistical analysis (hypothesis testing, regression) - Experience with product analytics tools (Mixpanel, Amplitude, Google Analytics) - Knowledge of marketplace or e-commerce metrics - Basic knowledge of machine learning concepts - Experience in Nigerian business context

Tools: SQL, Python (pandas, matplotlib, seaborn), Metabase/Tableau, Google Sheets, Jupyter Notebooks, Git

---

3.3 BUSINESS DEVELOPMENT LEAD

Field	Details
Role ID:	PECH-BIZ-BD-001
Department:	Product & Business
Reports To:	CEO
Location:	Lagos, Nigeria (On-site + Field)
Employment Type:	Full-Time
Hiring Phase:	Phase 5 (Months 17–20)
Compensation:	₦400,000/month

About the Role: You will drive PECH's growth by acquiring enterprise customers, building strategic partnerships, and opening new market segments. You will be the face of PECH to external partners — from solar installation companies to banks to government agencies.

Key Responsibilities: 1. Identify, pursue, and close enterprise sales opportunities (B2B marketplace, IoT solutions) 2. Build and manage partnerships with solar companies, logistics providers, and financial institutions 3. Develop and maintain a sales pipeline using CRM tools 4. Negotiate contracts and commercial terms with partners and clients 5. Represent PECH at industry events, conferences, and government forums 6. Conduct market research and competitive analysis for new opportunities 7. Collaborate with Product team on customer feedback and feature requests 8. Achieve quarterly revenue and partnership targets

Required Qualifications: - B.Sc. in Business Administration, Marketing, or related field - 5+ years of business development or enterprise sales experience - Proven track record of closing B2B deals (₦10M+ deal sizes preferred) - Strong understanding of Nigerian business landscape - Excellent negotiation, presentation, and relationship management skills - Experience with CRM tools (Salesforce, HubSpot, or similar) - Willingness to travel within Nigeria

Preferred Qualifications: - Experience in tech, renewable energy, or fintech sectors - Existing network of contacts in solar, logistics, or banking industries - MBA or relevant professional certification - Experience with government procurement or public-private partnerships - Knowledge of West African markets beyond Nigeria

Tools: HubSpot/Salesforce CRM, Google Workspace, Canva/PowerPoint, LinkedIn Sales Navigator

---

3.4 PSSP COMPLIANCE OFFICER

Field	Details
Role ID:	PECH-BIZ-CO-001
Department:	Product & Business
Reports To:	CEO
Location:	Lagos, Nigeria (On-site)
Employment Type:	Full-Time
Hiring Phase:	Phase 6 (Months 21–24)
Compensation:	₦400,000/month

About the Role: You will ensure PECH's payment services operate in full compliance with Nigerian regulations — CBN, NDIC, EFCC, NDPA, and all applicable financial services laws. You will manage the PSSP licensing process, implement AML/KYC frameworks, and be the internal authority on regulatory compliance.

Key Responsibilities: 1. Manage PSSP/PSP licensing application and renewal process with CBN 2. Implement and maintain AML/CFT (Anti-Money Laundering / Counter Financing of Terrorism) framework 3. Design and enforce KYC/KYB (Know Your Customer/Business) procedures 4. Conduct regular compliance audits and risk assessments 5. Prepare and submit regulatory reports to CBN, NDIC, and other bodies 6. Train staff on compliance policies and procedures 7. Monitor regulatory changes and advise management on implications 8. Manage relationships with regulators and external compliance advisors

Required Qualifications: - B.Sc. in Law, Finance, Accounting, or related field - 4+ years of compliance experience in Nigerian financial services - Deep knowledge of CBN regulations, PSSP/PSP framework, and payment system guidelines - Understanding of AML/CFT regulations and KYC requirements - Experience with regulatory reporting and audit processes - Knowledge of Nigeria Data Protection Act (NDPA) 2023 - Professional certification (ACAMS, ICA, or equivalent) preferred

Preferred Qualifications: - LL.B or BL qualification - Experience at a fintech, payment company, or bank compliance department - Experience managing PSSP/PSP licensing process - Knowledge of PCI-DSS requirements - Experience with compliance management software

Tools: Compliance management systems, Microsoft Office, regulatory portals, audit tools

---

3.5 AI PRODUCT MANAGER

Field	Details
Role ID:	PECH-BIZ-AIP-001
Department:	Product & Business
Reports To:	CEO
Location:	Lagos, Nigeria (Hybrid)
Employment Type:	Full-Time
Hiring Phase:	Phase 3 (Months 9–14)
Compensation:	₦500,000–800,000/month

About the Role: You will own the AI product roadmap across all 10 PECH verticals. You define which AI features to build, prioritize based on user impact and revenue potential, and work with the AI engineering team to ship them. You are the bridge between business strategy and AI capability.

Key Responsibilities: 1. Define AI product roadmap across all verticals (solar, marketplace, fintech, logistics) 2. Prioritize AI features based on user research, revenue impact, and technical feasibility 3. Design subscription tiers for AI features (free, basic, pro, enterprise) 4. Write PRDs (Product Requirements

Documents) for AI features 5. Analyze AI usage metrics and optimize feature adoption 6. Research competitor AI features and emerging model capabilities 7. Manage AI feature beta programs and user feedback loops 8. Collaborate with AI engineers on feasibility and timeline estimation

Required Qualifications: - B.Sc. in Computer Science, Business, or related field - 3+ years of product management experience - Experience with AI/ML products or data-driven platforms - Strong analytical skills (SQL, data analysis) - Excellent communication (translate technical AI to business value) - Experience with product analytics tools

Preferred Qualifications: - Experience with LLM-powered products - Understanding of RAG, embeddings, and AI model capabilities - Experience in African tech or fintech - MBA or product management certification

Tools: Jira/Linear, Figma, SQL, Apache Superset, Notion, Miro

---

3.6 DEVELOPER ADVOCATE

Field	Details
Role ID:	PECH-BIZ-DA2-001
Department:	Product & Business
Reports To:	AI Product Manager
Location:	Lagos, Nigeria (Hybrid) or Remote
Employment Type:	Full-Time
Hiring Phase:	Phase 3 (Months 9–14)
Compensation:	₦400,000–600,000/month

About the Role: You will be the public face of PECH's developer ecosystem. You create documentation, tutorials, sample code, and SDKs that help external developers integrate with PECH APIs (marketplace, fintech, AI, IoT). You also represent PECH at conferences and developer meetups.

Key Responsibilities: 1. Create and maintain API documentation (OpenAPI/Swagger specs) 2. Build sample applications and integration guides 3. Write technical blog posts and tutorials 4. Manage developer community (Discord/Slack, GitHub discussions) 5. Speak at tech conferences and meetups (Nigeria and Africa) 6. Collect developer feedback and relay to product/engineering 7. Create and maintain SDKs (JavaScript, Python) 8. Build and maintain developer portal (Strapi-based)

Required Qualifications: - B.Sc. in Computer Science or related field - 2+ years of software development experience - Strong writing and communication skills (English) - Experience with REST APIs and at least one SDK language (JavaScript/Python) - Public speaking experience (meetups, conferences, or YouTube) - Active technical blog or GitHub profile

Preferred Qualifications: - Previous developer relations / advocacy experience - Experience with API documentation tools (Swagger, Redoc) - Experience in African tech ecosystem - Nigerian language proficiency (Yoruba, Hausa, Igbo, or Pidgin)

Tools: Strapi, Swagger/Redoc, Git/GitHub, Notion, Google Workspace, video editing tools

---

3.7 TECHNICAL WRITER

Field	Details
Role ID:	PECH-BIZ-TW-001
Department:	Product & Business

Reports To:	AI Product Manager
Location:	Lagos, Nigeria (Hybrid) or Remote
Employment Type:	Full-Time
Hiring Phase:	Phase 2 (Months 5–8)
Compensation:	₦250,000–400,000/month

About the Role: You will create all technical documentation for PECH's platform — API docs, user guides, installation manuals, training materials, and internal engineering docs. You ensure every product, service, and AI feature is well-documented for both internal teams and external users.

Key Responsibilities: 1. Write and maintain API documentation for all PECH services 2. Create user guides for AI features (chatbot, OCR, voice, image editing) 3. Write installation and setup guides for solar products and IoT devices 4. Create training materials for installer network and field agents 5. Maintain internal engineering documentation (architecture, runbooks) 6. Edit and proofread all external-facing content 7. Create video scripts for product tutorials 8. Manage documentation versioning and release notes

Required Qualifications: - B.Sc. in English, Communications, Computer Science, or related field - 2+ years of technical writing experience - Excellent English writing skills (grammar, clarity, structure) - Ability to understand and explain technical concepts to non-technical audiences - Experience with documentation tools (Markdown, Git, Confluence/Notion) - Basic understanding of APIs and software concepts

Preferred Qualifications: - Experience with docs-as-code workflow (Git, Markdown, CI/CD) - Experience documenting APIs (OpenAPI/Swagger) - Familiarity with AI/ML concepts - Experience in Nigerian tech ecosystem

Tools: Markdown, Git, Strapi, Notion, Google Workspace, Figma (screenshots), Loom (video)

---

4. OPERATIONS

4.1 MARKET OPERATIONS MANAGER

Field	Details
Role ID:	PECH-OPS-MOM-001
Department:	Operations
Reports To:	CEO
Location:	Lagos, Nigeria (On-site + Field)
Employment Type:	Full-Time
Hiring Phase:	Phase 1 (Months 1–4)
Compensation:	₦300,000/month

About the Role: You will manage the day-to-day operations of PECH's marketplace — onboarding vendors, managing customer experience, handling disputes, and ensuring smooth order fulfillment. You are the bridge between technology and the real-world market operations.

Key Responsibilities: 1. Manage vendor onboarding, verification, and quality control for the marketplace 2. Monitor marketplace KPIs (GMV, order fulfillment rate, customer satisfaction) 3. Handle customer disputes, refunds, and escalations 4. Coordinate with logistics team on delivery and fulfillment 5. Train and manage field agents for market data collection 6. Implement marketplace policies (returns, fraud prevention, seller standards) 7. Conduct field visits to vendors and market locations 8. Report operational metrics and insights to management

Required Qualifications: - B.Sc. in Business Administration, Operations Management, or related field - 3+ years of operations management experience - Experience in marketplace, e-commerce, or retail operations - Strong organizational and problem-solving skills - Excellent communication skills (English + at least one Nigerian language) - Proficiency in Google Workspace / Microsoft Office - Willingness to travel locally for field operations

Preferred Qualifications: - Experience managing vendor relationships in Nigerian markets - Experience with CRM or marketplace management tools - Knowledge of Nigerian logistics infrastructure - Experience managing field teams - Understanding of FMCG or agricultural supply chains

---

4.2 LOGISTICS OPERATIONS LEAD

Field	Details
Role ID:	PECH-OPS-LOL-001
Department:	Operations
Reports To:	Market Operations Manager / CEO
Location:	Lagos, Nigeria (On-site + Field)
Employment Type:	Full-Time
Hiring Phase:	Phase 4 (Months 13–16)
Compensation:	₦350,000/month

About the Role: You will build and manage PECH's logistics and delivery network — from last-mile delivery in Lagos to inter-state shipments. You will optimize routes, manage delivery partners, and ensure products and solar equipment reach customers on time.

Key Responsibilities: 1. Design and optimize delivery routes and logistics workflows 2. Manage relationships with third-party logistics providers and dispatch riders 3. Implement and manage warehouse operations (receiving, storage, dispatch) 4. Track and optimize delivery KPIs (delivery time, cost per delivery, damage rate) 5. Coordinate solar panel/IoT equipment installation logistics 6. Implement inventory management and stock tracking systems 7. Handle logistics-related customer complaints and damage claims 8. Plan logistics expansion to new cities and regions

Required Qualifications: - B.Sc. in Supply Chain Management, Business, or related field - 3+ years of logistics or supply chain experience in Nigeria - Experience managing delivery operations and warehouse management - Knowledge of Nigerian geography and transportation infrastructure - Experience with logistics tracking and inventory management tools - Strong negotiation skills for vendor/partner management

Preferred Qualifications: - Experience with last-mile delivery in Lagos - Experience with tech-enabled logistics (route optimization, tracking) - Knowledge of solar panel or heavy equipment delivery - Experience managing warehouse staff - Familiarity with cold chain or fragile goods logistics

---

4.3 REGIONAL FIELD COORDINATOR

Field	Details
Role ID:	PECH-OPS-RFC-001
Department:	Operations
Reports To:	Market Operations Manager
Location:	Various locations across Nigeria
Employment Type:	Full-Time
Hiring Phase:	Phase 5 (Months 17–20)
Compensation:	₦150,000/month

About the Role: You will coordinate PECH's field operations in your assigned region — managing field agents, supervising market surveys, overseeing equipment installations, and ensuring service quality across your territory.

Key Responsibilities: 1. Recruit, train, and manage field agents in assigned region 2. Supervise market surveys, data collection, and vendor verification 3. Coordinate solar panel and IoT device installations in the region 4. Monitor field agent performance and submit weekly reports 5. Handle regional customer escalations and service issues 6. Build local partnerships with community leaders and businesses 7. Ensure compliance with PECH operational standards and safety protocols 8. Report market intelligence and growth opportunities from the field

Required Qualifications: - OND/HND/B.Sc. in any field - 2+ years of field operations or supervisor experience - Strong knowledge of local geography and communities in assigned region - Excellent communication skills (English + relevant local languages) - Ability to manage and motivate a team of field agents - Basic computer literacy (Google Workspace, WhatsApp Business) - Valid driver's license preferred

Preferred Qualifications: - Experience in solar energy, telecommunications, or FMCG distribution - Experience with mobile data collection tools - Prior supervisory or team lead experience - Knowledge of local government and community structures

4.4 SUPPORT REPRESENTATIVE

Field	Details
Role ID:	PECH-OPS-SR-001
Department:	Operations
Reports To:	Market Operations Manager
Location:	Lagos, Nigeria (On-site)
Employment Type:	Full-Time
Hiring Phase:	Phase 3 (Months 9–12)
Compensation:	₦150,000/month

About the Role: You will be the first point of contact for PECH's customers and vendors. You will handle inquiries, resolve issues, escalate technical problems, and ensure every interaction leaves a positive impression. Fluency in multiple Nigerian languages is a strong plus.

Key Responsibilities: 1. Respond to customer inquiries via phone, email, WhatsApp, and live chat 2.

Troubleshoot basic IoT device issues (connectivity, setup, readings) 3. Process order inquiries, refund requests, and vendor disputes 4. Escalate technical issues to engineering team with clear documentation 5. Maintain customer support knowledge base and FAQ 6. Track support metrics (response time, resolution time, CSAT scores) 7. Follow up with customers on pending issues 8. Identify patterns in customer complaints and suggest improvements

Required Qualifications: - OND/HND/B.Sc. in any field - 1+ year of customer support or call center experience - Excellent communication skills (English required; Yoruba, Igbo, Hausa, or Pidgin strongly preferred) - Basic computer skills (email, Google Workspace, CRM tools) - Patience, empathy, and problem-solving mindset - Ability to work in shifts (including weekends as needed)

Preferred Qualifications: - Experience with support tools (Freshdesk, Zendesk, Intercom) - Experience in tech support or IoT/electronics support - Multilingual (3+ Nigerian languages) - Experience with WhatsApp Business or social media customer service

---

4.5 FIELD AGENT (CONTRACT)

Field	Details
Role ID:	PECH-OPS-FA-001
Department:	Operations
Reports To:	Regional Field Coordinator / Market Operations Manager
Location:	Various locations across Nigeria
Employment Type:	Contract (per-project or monthly)
Hiring Phase:	Phase 2 onwards (rolling recruitment)
Compensation:	₦80,000/month + performance bonus

About the Role: You will be PECH's eyes and ears in the field. You will conduct market surveys, verify vendor information, collect data on local market conditions, assist with device installations, and represent PECH in local communities.

Key Responsibilities: 1. Conduct market surveys and data collection using mobile apps 2. Verify vendor identities, locations, and business credentials 3. Assist with solar panel and IoT device installations 4. Collect customer feedback and market intelligence 5. Distribute marketing materials and represent PECH at local events 6. Submit daily activity reports and field data 7. Maintain PECH equipment and branded materials 8. Follow safety protocols during field operations

Required Qualifications: - SSCE/OND minimum qualification - Resident of the assigned operational area - Strong knowledge of local markets and communities - Good communication skills in English and local languages - Smartphone ownership with internet access - Physical fitness for field work - Honest, reliable, and self-motivated

Preferred Qualifications: - Previous field agent or survey experience - Experience with mobile data collection apps (ODK, KoboToolbox) - Motorcycle or vehicle ownership - Experience in sales or marketing - Knowledge of solar energy products

---

4.6 INSTALLER TRAINING & NETWORK MANAGER

Field	Details
Role ID:	PECH-OPS-ITN-001
Department:	Operations

Reports To:	Market Operations Manager
Location:	Lagos, Nigeria (On-site + Field)
Employment Type:	Full-Time
Hiring Phase:	Phase 2 (Months 5–8)
Compensation:	₦350,000–500,000/month

About the Role: You will build and manage PECH's solar installer network across Nigeria. You recruit, train, certify, and manage independent solar installers who install PECH solar products. You also develop AI-assisted training programs and maintain installer quality standards.

Key Responsibilities: 1. Recruit and onboard solar installers across Lagos and expansion cities 2. Develop installer training curriculum (technical + customer service) 3. Manage AI-powered training platform (video courses, assessments, certifications) 4. Conduct quality audits of completed installations 5. Maintain installer performance metrics (completion rate, customer ratings, warranty claims) 6. Manage installer certification and re-certification process 7. Coordinate with solar product team on new product training 8. Build partnerships with technical schools and vocational training centers

Required Qualifications: - B.Sc./HND in Electrical Engineering, Renewable Energy, or related field - 3+ years of experience in solar energy installation or training - Understanding of solar PV systems (design, installation, troubleshooting) - Strong organizational and communication skills - Experience managing field teams or training programs - Valid driver's license and willingness to travel

Preferred Qualifications: - NABCEP or equivalent solar certification - Experience with e-learning platforms (LMS) - Experience in franchise or agent network management - Proficiency in multiple Nigerian languages

Tools: ThingsBoard (installation monitoring), Google Workspace, LMS platform, PECH installer app

---

4.7 FINTECH OPERATIONS / AGENT NETWORK MANAGER

Field	Details
Role ID:	PECH-OPS-FIN-001
Department:	Operations
Reports To:	CEO / Payments Product Manager
Location:	Lagos, Nigeria (On-site)
Employment Type:	Full-Time
Hiring Phase:	Phase 2 (Months 5–8)
Compensation:	₦400,000–600,000/month

About the Role: You will build and manage PECH's fintech agent banking network (powered by Apache Fineract). You recruit, train, and manage cash-in/cash-out agents, oversee PSSP compliance operations, and ensure smooth fintech operations across all payment channels.

Key Responsibilities: 1. Build and manage the agent banking network (recruit, train, equip agents) 2. Monitor agent performance, liquidity, and fraud indicators 3. Ensure PSSP and CBN regulatory compliance for all payment operations 4. Manage KYC/KYB processes for agents and customers 5. Coordinate with fraud detection team on suspicious transaction alerts 6. Manage payment gateway integrations (Paystack, Flutterwave) 7. Handle customer complaints related to payments and transfers 8. Report on fintech metrics (transaction volume, agent activity, revenue)

Required Qualifications: - B.Sc. in Finance, Business Administration, Banking, or related field - 3+ years of experience in fintech operations, banking, or agent network management - Knowledge of CBN regulations,

KYC/AML requirements - Experience with mobile money or digital payments platforms - Strong analytical skills (Excel, SQL is a plus) - Excellent communication and people management skills

Preferred Qualifications: - Experience with PSSP/PSP licensing and compliance - Experience managing agent networks (POS agents, mobile money agents) - Knowledge of fraud detection and prevention - Experience with Paystack, Flutterwave, or similar payment platforms

Tools: Apache Fineract (core banking), PECH admin dashboard, Paystack/Flutterwave APIs, compliance management tools

5. INTERNSHIP PROGRAMME

PECH Internship Programme Overview: - Duration: 3–6 months (as per PECH Internship Agreement) - Stipend: ₦50,000–80,000/month (NOT salary — per internship agreement terms) - Interns are NOT employees — they are participants in a structured learning programme - No equity, no benefits (pension, HMO) — per internship agreement Section 4 - Conversion to full-time is possible but NOT guaranteed - Candidates under 18 require parental/guardian consent - All interns sign the PECH Internship Agreement (separate from Employment Contract)

5.1 FRONTEND DEVELOPMENT INTERN

Field	Details
Role ID:	PECH-INT-FE-001
Department:	Engineering
Reports To:	Frontend Developer / CTO
Duration:	3–6 months
Stipend:	₦50,000–80,000/month

Learning Objectives: - Learn React/Next.js and TypeScript through hands-on project work - Build responsive UI components under mentorship - Learn Git workflows, code review practices, and CI/CD basics - Contribute to the PECH design system and component library

Requirements: - Currently enrolled in or recently graduated from a CS/IT/Engineering programme - Basic knowledge of HTML, CSS, and JavaScript - Eagerness to learn React and modern frontend development - Portfolio of personal projects (even simple ones) preferred - Available for minimum 3 months

5.2 BACKEND DEVELOPMENT INTERN

Field	Details
Role ID:	PECH-INT-BE-001
Department:	Engineering

Reports To:	Backend Developer / CTO
Duration:	3–6 months
Stipend:	₦50,000–80,000/month

Learning Objectives: - Learn Node.js/Express API development - Work with PostgreSQL databases (queries, schema design, migrations) - Learn authentication, API security basics, and RESTful design - Write tests and documentation for backend services

Requirements: - Currently enrolled in or recently graduated from a CS/IT/Engineering programme - Basic knowledge of at least one programming language (JavaScript, Python, or Java) - Understanding of basic data structures and algorithms - Enthusiasm for backend systems and problem-solving - Available for minimum 3 months

5.3 IoT / EMBEDDED SYSTEMS INTERN

Field	Details
Role ID:	PECH-INT-IOT-001
Department:	Engineering
Reports To:	IoT/Embedded Engineer
Duration:	3–6 months
Stipend:	₦50,000–80,000/month

Learning Objectives: - Learn ESP32/Arduino programming and sensor integration - Work with MQTT communication protocol - Assist in building and testing prototype IoT devices - Learn PCB design basics and lab equipment usage

Requirements: - Currently enrolled in or recently graduated from Electrical/Electronic/Computer Engineering - Basic knowledge of C/C++ programming - Interest in hardware, electronics, and IoT - Familiarity with Arduino or similar platforms is a plus - Available for minimum 3 months (on-site required for lab access)

5.4 DEVOPS INTERN

Field	Details
Role ID:	PECH-INT-DO-001
Department:	Engineering
Reports To:	DevOps Engineer
Duration:	3–6 months
Stipend:	₦50,000–80,000/month

Learning Objectives: - Learn Linux system administration and command-line tools - Work with Docker containers and basic CI/CD pipelines - Learn cloud services basics (AWS/Azure) - Assist with monitoring, logging, and infrastructure tasks

Requirements: - Currently enrolled in or recently graduated from CS/IT/Engineering programme - Basic Linux command-line skills - Interest in infrastructure, cloud computing, and automation - Basic understanding of networking concepts - Available for minimum 3 months

5.5 UI/UX DESIGN INTERN

Field	Details
Role ID:	PECH-INT-UX-001
Department:	Design
Reports To:	UI/UX Designer
Duration:	3–6 months
Stipend:	₦50,000–80,000/month

Learning Objectives: - Learn Figma for professional UI design (components, auto-layout, prototyping) - Assist in user research activities (interviews, surveys, usability tests) - Create wireframes and mockups under mentorship - Contribute to the PECH design system

Requirements: - Currently enrolled in or recently graduated from Design, Fine Arts, Computer Science, or related programme - Basic knowledge of Figma or any design tool (Sketch, Adobe XD) - Strong visual eye and interest in user experience - Portfolio of design work (school projects, personal projects accepted) - Available for minimum 3 months

5.6 DATA / ANALYTICS INTERN

Field	Details
Role ID:	PECH-INT-DA-001
Department:	Product & Business
Reports To:	Data Analyst
Duration:	3–6 months
Stipend:	₦50,000–80,000/month

Learning Objectives: - Learn SQL for data querying and analysis - Work with Python (pandas) for data processing - Assist in building dashboards and reports - Learn data visualization best practices

Requirements: - Currently enrolled in or recently graduated from Statistics, Mathematics, Computer Science, Economics, or related programme - Basic Excel/Google Sheets skills - Interest in data analysis and business intelligence - Basic programming knowledge (Python or R preferred) - Available for minimum 3 months

5.7 BUSINESS OPERATIONS INTERN

Field	Details
Role ID:	

	PECH-INT-BO-001
Department:	Operations
Reports To:	Market Operations Manager
Duration:	3–6 months
Stipend:	₦50,000–80,000/month

Learning Objectives: - Learn marketplace operations (vendor management, order fulfillment) - Assist with customer support and issue resolution - Learn business process documentation and SOP creation - Support field operations coordination and reporting

Requirements: - Currently enrolled in or recently graduated from Business Administration, Management, or related programme - Good communication skills (English + at least one Nigerian language) - Basic computer skills (Google Workspace, email) - Interest in technology, operations, and African markets - Available for minimum 3 months

---

5.8 AI/ML ENGINEERING INTERN

Field	Details
Role ID:	PECH-INT-AI-001
Department:	Engineering (AI/ML Team)
Reports To:	AI/ML Engineer
Duration:	3–6 months
Stipend:	₦80,000–120,000/month

Learning Objectives: - Learn practical AI/ML engineering (model deployment, not just theory) - Assist with data preparation for RAG pipelines and model fine-tuning - Help test and evaluate model performance across PECH use cases - Learn Docker, Linux, and GPU infrastructure management - Build sample AI features under supervision (chatbot, OCR, recommendations) - Contribute to AI documentation and testing

Requirements: - Currently enrolled in or recently graduated from Computer Science, AI/ML, Mathematics, or related programme - Basic Python programming skills - Interest in AI/ML (coursework, personal projects, or online courses) - Familiarity with basic ML concepts (supervised learning, NLP, neural networks) - Willingness to learn self-hosted AI infrastructure (not just cloud APIs) - Available for minimum 3 months

---

6. HOW TO APPLY

For all positions:

1. **Send your application to:** careers@pechgroupholdings.tech
2. **Subject line format:** `[Role ID] - Your Full Name` (e.g., `PECH-ENG-FE-001 - Adebayo Oladipo`)
3. **Include:**
4. Updated CV/Resume (PDF format)
5. Cover letter explaining why you want to join PECH (max 1 page)
6. Portfolio/GitHub link (for technical and design roles)
7. Completed PECH Candidate Application Form (attached to this posting or available on request)
8. **Shortlisted candidates** will be contacted within 2 weeks of application
9. **Interview process** varies by role level (see PECH Interview Process document for details)

> **Note:** PECH Group Holdings Ltd is an equal opportunity employer. We do not discriminate based on

gender, ethnicity, religion, disability, or any other protected characteristic. We encourage applications from all qualified individuals across Nigeria and beyond.

7. BENEFITS & COMPENSATION OVERVIEW

All full-time employees are entitled to:

Benefit	Details
Pension	Employer contributes 10%, Employee contributes 8% (Pension Reform Act 2014)
Health Insurance	NHIA-compliant HMO coverage for employee (family coverage at senior levels)
Annual Leave	15–20 working days per year (varies by level)
Sick Leave	As per Nigerian Labour Act provisions
Maternity Leave	12 weeks paid (Nigerian Labour Act)
Paternity Leave	2 weeks paid
Training & Development	Annual training budget per employee
Equipment	Laptop and necessary work tools provided
Probation Period	6 months (per Employment Contract Clause 3.2)

Note: All salaries are **gross** (pre-tax). PAYE tax, pension contributions, NHF (2.5%), and NSITF (1%) will be deducted as required by Nigerian law. Net salary will be lower than the stated gross figures.

Internship stipends are separate from employee benefits. Interns do not receive pension, HMO, or leave entitlements. See the PECH Internship Agreement for intern-specific terms.
